KNOW-HOW

- *The Flooring 1-2-3 book is a great resource for a flooring project*
- *Always purchase 10% extra flooring planks to allow for scrap*
- *Store the flooring planks in the room where it will be installed at least 48 hours prior to installation to acclimate the wood to the local humidity*
- *Make sure the subfloor is level, clean, free from dust, oil, wax or grease*
- *If installing over concrete, check the water vapor emission. It may be necessary to use rosin paper for additional protection*
- *To improve appearance, plan your layout with planks running the length of the room*
