Dear Gardeners,

We've been working hard to continue to bring you unique cost-effective innovations for your Home and Garden.

With our award winning one-of-a-kind Pop-Up Greenhouses and Storage Sheds, Harvest House Series with X-Up Technology and our **ALL NEW ECLIPSE LIGHT DEP GREENHOUSE SYSTEM**. This is a flower forcer system that can increase your harvest from one crop per year to three crops a year!

We've made gardening easier than ever with our lift and lock X-Up Shelving Systems, Eclipse System and the POP-Up greenhouses!

Be sure to experience the comfort and affordability of our unique **Egg Chair family** of products, the Pumpkin Loveseat the original Egg Chair and Egg Chair Junior.

Our **Butterfly Furniture** line with the Original Cast Aluminum Butterfly Twin and Butterfly Bistro Set... a beautiful addition to any home or garden.

It's an automatic way to maximize your harvest by using our automatic **Solar Rain Maker**, it works great to water hanging pots, and containers – the perfect addition to all of our greenhouses.

We value our customers and thank you for your continued support.

Sincerely,
Scott Wehner
and the FlowerHouse Team

FlowerHouse

www.flowerhouses.com (810) 686-8252

Our original GRO-TEC™ greenhouses feature GRO-TEC™ exterior sheeting system.

FlowerHouse® greenhouses are constructed with durable GRO-TEC™ material. GRO-TEC™ is UV resistant and features rip stop protection. GRO-TEC™ diffuses or scatters light. Letting in 75% of available light. Diffused light benefits plants both by reducing excess light on upper leaves and by increasing the amount of light reflected onto the lower leaves. See pages 2-5, 9-17, 22-23 for all of our GRO-TEC™ greenhouses.

Start Your Garden With These GRO-TEC™ Greenhouses Features:

- Open bottom allows for placement over existing plants, beds and containers.
- Protects plants from wind, frost and snow.
- Screened vents protect against most insects, birds and other pests.
- Constructed from durable GRO-TEC™ material.
- Full zipper closures and ample screened ventilation.
- Free shade cover, tent stakes and storage bag.
- Lightweight and compact for easy transport and storage.
- Designed to set up on soil or hard surface, in or outdoors.
- Accesses for water hose or power cords are integrated in our greenhouse designs.
- Night temperatures inside your FlowerHouse® will drop to outside temperatures without an additional heat source. See page 30 for heating options.

RowHouse™ Easy Pop-Up!

1'h x 12'w x 2'd

FlowerHouse® Solar RainMaker® automatic watering system

The Solar Rainmaker SOL-K12 waters automatically every 3 hours. The amount applied varies depending upon the amount of sunshine and the position of the control knob. The Solar RainMaker SOL-K12 can be set up to water large or small plants, but will always apply more water in sunnier conditions, when your plants need it most. The Solar Rainmaker SOL-K12 can supply up to 12 drippers and is suitable for beds, baskets, vegetables, pots, grow bags, specimen plants and tree establishment.

The Solar Rainmaker SOL-K12 supplies enough water for 6 large hanging baskets or 12-12" pots.

Place the Solar Rainmaker SOL-K12 in a sunny position near your water barrel or similar non-pressured water supply. Insert feeder tube into the water barrel and arrange the drip tubes as required to water your plants. Switch on the unit and your plants will be automatically watered using solar power.

Solar RainMaker SOL-K12

Easy Pop-Up!

Shown with U-shaped Shelf Sets: (sold separately)

Free shade cover is included on our walk-in clear greenhouses. Shade cover is recommended for young plants and bright sunny conditions. This helps to diffuse the light that helps plants grow with less stress from heat and direct sun. Shade cloth will also help your greenhouse to last longer. We also recommend storing your greenhouse when not in use.

Your FlowerHouse® provides an excellent environment for growing vegetables, flowers, tropical plants, fruiting plants, herbs and spices and also makes a great pond cover for water plants. Other uses include sun room, storage building, and Spa cover.

Bigger Better Architectural Designs!

Architectural Form Advantages.

For maximum transmission of radiant energy, the ideal architectural form for a greenhouse is the hemispherical dome. The angle of incidence and the orientation are perfect at all hours of the day.

A greenhouse with sidewalls at an angle of 60 to 70 degrees from the horizontal and a roof with a slope of 30 degrees has been found to be more efficient for the transmission of radiant energy than a structure with the same roof slope but with vertical sidewalls (Whittle and Lawrence, 1959).

During mid-winter when the sun is relatively low above the horizon, the slanted sidewalls transmit more radiant energy than the vertical sidewalls. FlowerHouse® designed the DomeHouse®, BloomHouse™ and OrchidHouse™ model greenhouses with this design feature in mind.

These greenhouses include free storage bag with shoulder strap.

Our original GRO-TEC™ greenhouses feature GRO-TEC™ exterior sheeting system.

FlowerHouse® greenhouses are constructed with durable GRO-TEC™ material. GRO-TEC™ is UV resistant and features rip stop protection. GRO-TEC™ diffuses or scatters light. Letting in 75% of available light. Diffused light benefits plants both by reducing excess light on upper leaves and by increasing the amount of light reflected onto the lower leaves. See pages 2-5, 9-17, 22-23 for all of our GRO-TEC™ greenhouses.

Special Features That You'll Find Included With Most Of Our Greenhouses:

- Free storage bag with shoulder strap.
- Ground stakes. Walk-in models also include high wind tie-downs.
- Free shade cover to diffuse light.
- Multiple access for water hose or power cords are integrated in our designs.
- Screened vents and doors to protect plants from insects and other pests.

Some of Our Innovation Awards:

Master Gardeners across the world recognize the function and ease of use of the unique FlowerHouse® Pop-Up designs.

At the largest garden show in the world, in Cologne, Germany, FlowerHouse® was honored for its innovative Pop-Up greenhouse design.

FlowerHouse® Easy Fold Up Instructions for GreenHouses

1. Remove all of the following where applicable, Shade Cloth, Tent Stakes, Fiber Poles, and store them in the storage bag that they came in. (Helpful hint: be sure your unit is clean and dry. Do not put accessories storage bags into main storage pack until greenhouse is fully packed.)
2. Fold your Flowerhouse® from two panels into one as shown in Figure A. (Helpful hint: tuck excess material in between bands so it does not hang out beyond frame edge.)
3. Choose one of the corners. With both hands, fold your Flowerhouse® into a U shape like a giant soft shell taco, folding corner to opposite corner diagonally as shown in Figure B. (Helpful hint: you will feel the tension of the spring steel, this is OK.)
4. As the top corner in your hands meets the diagonally opposite corner on the ground as shown in Figure C, pull or tuck the top corner back under toward your feet, as shown in Figure D. (Helpful hint: as you pull or tuck top corner back UNDER toward your feet you will feel tension release as shown in Figure D.)
5. Then fold the ring on your left side and the right on your right side down over center ring forming three rings, as shown in Figure E. (Helpful hint: the goal is to form three equally sized rings.)
6. This completes the folding of your Flowerhouse® lay it on the ground and kneel or press extra air out that was trapped during folding process, as shown in Figure F.
7. Returning the greenhouse to storage bag works best by holding the folded greenhouse between your knees and then pulling the bag over it, rotating slightly to fit, then pushing the unit in completely, so not to stress the zipper, as shown in Figure G.
8. Now you can place the accessories in their storage bags and next to or between the folded greenhouse. Now greenhouse can be easily stored. (Helpful hint: it is recommended that the greenhouse is then stored out of direct sunlight.)

Greenhouse Gardening Schedule

CHOOSING A LOCATION

Before setting up your FlowerHouse® contact local Miss Dig to establish locations of cables, gas lines and underground wires. Failure to do so could result in serious injury or death while inserting ground stakes. Place your FlowerHouse® on raised, level ground to ensure good drainage. Location should receive maximum sun exposure. Protect your FlowerHouse® from prevailing winds by placing it next to your house, garage or other structure. FlowerHouse® greenhouses are designed to with stand high winds not exceeding 60 mph. Secure all ground stakes and high wind tie downs for maximum stability.

MAXIMIZING SPACE USE

The interior design and layout of your FlowerHouse® will depend on the type and quantity of plants you choose to grow. Plant benches, adjustable shelving and trellises will help you optimize your working space.

MAINTENANCE AND STORAGE

Hose down your FlowerHouse® with a low-pressure sprayer. Mild dish soap may be used. Do not use harsh chemical cleaners. Before storing, ensure that your FlowerHouse® is clean and COMPLETELY DRY. Mold and mildew can grow if it is stored damp.

WATERING

All FlowerHouse® greenhouses feature access ports for your garden hose. Use mist or lowest setting on a hose sprayer. Morning is the best time to water. Avoid watering later in the day to help prevent plant diseases. Check soil for moisture frequently throughout the day, this is especially important in warm weather.

*IDEAL GREENHOUSE TEMPERATURE

The ideal temperatures to maintain inside your greenhouse will be dictated by what plants you have inside. Over wintering tropical plants to starting seeds, remember all plants and seeds have preferred growing and germination requirements. This specific information is readily available at your local garden center, online and in numerous publications.

The DREAMHOUSE™ and FARMHOUSE™ model greenhouses from FLOWERHOUSE®, allow you to zip multiple greenhouses together. This allows you to create multiple climactic environments!

HEATING

The most effective way to heat your FlowerHouse® greenhouse is with a small ceramic heater. There are numerous models on the market, however we recommend you look for a ceramic heater with the following features:

- Automatic overheat shut off.
- Thermostat control. Allows you to set your desired temperature, heater will automatically turn off and on to maintain your set temperature.
- Humidity sensor. Reads percent of humidity in the air. Heaters of this type are readily available at your local stores.
- Placing black weed cloth (not included) on the floor of your greenhouse will absorb heat to keep your greenhouse warmer.
- A large thermal mass, bucket of water or large stones can be placed in your greenhouse to absorb and store heat during the day. At night this stored heat is released, warming your greenhouse. A 55-gallon drum of water works well in the walk in style greenhouses. Placing a heating pad beneath the drum will generate additional warmth. Adjusting the vent openings will change the inside temperature reading. Always use extreme caution when using electrical devices. Keep away from water in case of electrical shock or fire.

COOLING

To lower inside temperature of your greenhouse, open screened vents and doors and attach shade cloth. A fan may also be used.

VENTILATION

It is essential to ensure good air circulation and ventilation year round. Stagnant air and or excessive humidity levels may result in fungus and disease, which can damage your plants.

FALL: Start heating system; ventilate night and day; remove shade cover; keep soil on the dry side; move tender tropical plants into greenhouse for over wintering.

A new garden season starts during the cold brisk days of autumn, but light is at a premium then for there are many cloudy days and the arc of the sun is very low. At this time, plants tend to make soft growth that is susceptible to mildew. Good air circulation is necessary to keep them healthy and disease free. Turn the heat on just as nights become cool (below 40° F), and for short periods when days are damp. Keep vents open throughout the day or roll doors down 6 inches from top. At night close side vents but do not zip tight, roll doors down 1 inch. Although this may seem like a waste of fuel, air circulation is important overnight. In some areas where damp weather prevails, fan heaters are preferable to ceramic as they provide greater air movement. Always use extreme caution when using any heating and/or electrical devices. Don't forget to water! Prepare clean pots, seed flats, and fresh soil for the greenhouse. Winter gardening is more pleasant and productive when supplies are ready for use. Fall is also a great time to start a new compost heap for spring planting. The warm fall rains provide the moisture needed. Freezing and thawing throughout the winter do wonders for soil structure.

WINTER:

On cold nights a common electric heater with fan is recommended. To help heat greenhouse a fan is recommended to keep warm air in motion. Plants like people, can't thrive in poor atmospheric conditions. In bright cold weather, it is easy to keep air fresh. The greenhouse traps more than enough heat from the sun, even though it may be freezing outside. During sunny days, open side vents 1 inch and/or roll down one door 1 inch from top. In the event of very windy weather, close vents and doors on the windward side. Seal completely during heavy snowfall and storms.

Always keep roof clear of snow.

On cold nights, artificial heat keeps air in motion. Leave only a small crack opening in door or vent. During long spells of cloudy weather, you will need to use artificial heat during the day to maintain your ideal temperature. Always use extreme caution when using any heating and/or electrical devices. Placing several pails of water inside your greenhouse can raise humidity. Remember to water!

To extend Greenhouse life, it is recommended that they are taken down when not in use.

Some of the products in this catalog are covered under one or more of the following U.S. Patents DES527,786; DES504,519; DES505,175; DES505,176; DES511, 196; DES533,336 and other patents pending. Flowerhouse, Farmhouse, Dreamhouse, Springhouse, Bloomhouse, DomeHouse, SeedHouse are registered trademarks of Worldwide Creations, LLC. Storagehouse, Planthouse, Conservatory, Orchidhouse, Hothouse and Rowhouse are trademarks of Worldwide Creations, LLC.

SPRING:

Increase temperature; start feeding schedule; maintain high humidity; attach shade cover. As days become longer, sunlight gets more intense, growth will be noticeably faster and flowering more profuse. Water daily, as required, and maintain a regular schedule of feeding. Hose down floor every morning to make up for evaporation, and to increase humidity. Continue to heat at night if temperature falls below 60° F. Daytime temperatures may run up to 85°F or more by the sun's heat although all vents and doors are open. This will not have a harmful effect. Attach Shade Cover when foliage starts to turn light green and shows signs of wilting under mid-day sun. Keep an eye on your local minimum temperatures to determine when to discontinue night heating. Move/ transplant your plants outdoors **after danger of last frost for your zone has past.**

SUMMER:

If you choose to leave your greenhouse up, most plants can be left in the greenhouse for they are unaffected by high temperatures if sufficient moisture, shade and humidity are maintained. Leave vents and doors open 24 hours a day. Summer is also a great time for propagating cuttings. A great way to multiply your favorite plants. All FlowerHouse® greenhouses can be folded down and stored in minutes at anytime of the year. We highly recommend that you hose off any soil and allow your greenhouse to dry thoroughly before storing. This insures that your greenhouse will be in good condition for its next use.

Your FlowerHouse® greenhouse makes a great storage shed for garden tools, and a convenient shelter for hanging baskets and potted plants during summer storms.

WARRANTY

Must return within 14 days of purchase with copy of dated register receipt.

FOR BEST PRODUCT LIFE WE RECOMMENDED YOU STORE YOUR FLOWERHOUSE PRODUCT OUT OF DIRECT SUNLIGHT WHEN NOT IN USE.

READ THIS AGREEMENT BEFORE SIGNING THE WARRANTY CARD

This FlowerHouse® product has a limited warranty. No other warranties, whether expressed or implied, including warranties of merchantability and fitness for a particular purpose, apply to the product.

I. GENERAL PROVISIONS OF LIMITED WARRANTY

- A. The original purchaser of this FlowerHouse® product is warranted against defects in material and workmanship for ONE year following the date of its retail purchase.
- B. The exclusive remedy for defects in material and workmanship under the warranty is replacement or repair at FlowerHouse's® expense.
- C. FlowerHouse® will, at its option, repair or replace products not conforming to this limited warranty at no charge. This is the sole and exclusive remedy available under any legal theory for this FlowerHouse™ product.
- D. Customer is responsible for all shipping and handling charges involved with warranty fulfillment.

II. NO OTHER WARRANTIES

No other warranties, whether expressed or implied, including warranties of merchantability and fitness for a particular purpose, shall apply to the product.

III. EXCLUSIONS, LIMITATIONS, AND CONDITIONS OF LIMITED WARRANTY

- A. This warranty cannot be assigned or transferred.
- B. This warranty only applies if the FlowerHouse® product is used in accordance with FlowerHouse's® written instructions.

- C. FlowerHouse® products are intended only for gardening. FlowerHouse™ products are not intended or authorized for use in any situations that may create health or injury risks.
- D. This warranty is void if the product is damaged through abuse, accident, improper use, negligence, or normal wear and tear.
- E. This warranty is void if the product is altered, changed or modified in any manner.
- F. This warranty is void if any attempt is made to repair the product without written authorization from FlowerHouse®.
- G. Except as provided in this limited warranty, all FlowerHouse® products are provided "as is." All other warranties and representations, oral or written, expressed or implied, including but not limited to any implied warranties of merchantability or fitness for a particular purpose, are excluded and do not apply.

IV. PROCEDURES IN EVENT OF DEFECT

- A. If you find a product to be defective, contact FlowerHouse®, Box 595, Clio, MI 48420; phone: (810) 686-8252; fax: (810) 686-5492.
- B. When you receive authorization from FlowerHouse®, return the product as directed by FlowerHouse®.

V. LIMITATION OF DAMAGES

- A. FlowerHouse® shall not, under any circumstances or legal theory, be liable or responsible for direct, indirect, special, incidental, or consequential damages.
- B. FlowerHouse® shall not, under any circumstances or legal theory, be liable or responsible for any amount in excess of the product purchase price.

- C. FlowerHouse® shall not, under any circumstances or legal theory, be liable or responsible for damage to items or equipment used with the FlowerHouse® product.
- D. FlowerHouse® shall not, under any circumstances or legal theory, be liable for personal injury, personal loss, lost profits, lost wages, goodwill, downtime, economic loss in excess of the product purchase price, or any non-economic damages.

VI. ADDITIONAL PROVISIONS

- A. This agreement is the entire agreement between you and FlowerHouse®. This agreement supersedes any prior or different agreements, representations, or proposals, whether written or oral.
- B. No representative, agent or employee of FlowerHouse® is authorized to make warranties, representations, or obligations other than those set forth in this limited warranty.
- C. This agreement may only be changed through an express written agreement with FlowerHouse®.
- D. Waiver by any party of any default or breach of this agreement will not constitute a waiver of any subsequent default or breach of the same or different kind.
- E. If any section or provision of this agreement is found to be invalid, such invalidity does not affect or extend to other sections or provisions in this agreement.
- F. This warranty gives you the specific legal rights. You may also have other rights that vary from state to state. This agreement shall be governed by the laws of the State of Michigan, United States of America.
