Owens Corning™ Aluminum and Vinyl Garage Door Bottom Seal

Product Data Sheet

Description

Owens Corning™ Aluminum and Vinyl Garage Door Bottom Weatherstrip is designed to help keep your garage clean and more comfortable by forming a weathertight seal to help protect against drafts, dust, moisture, debris and insects all season long.

A low temperature vinyl seal closes gaps up to 3/4" at the bottom of garage door and stays flexible to -30°F. The vinyl seal insert is held in place with a sturdy aluminum extrusion fastened to the bottom of the garage door with included screws.

Recommended for both wood and metal garage doors.

Comes in two sizes: 9' for a single car garage and 18' for a two car garage.

- Two—54" long Aluminum Channels
- One—9' (108") long Vinyl Seal
- Color—Extrusion: Silver; Vinyl Seal: Black
- Ten—3/4" long 1/4" Hex head self-drilling screws

18' Aluminum and Vinyl Garage Door Bottom Seal

- Four—54" long Aluminum Channels
- One—18' (216") long Vinyl Seal
- Color—Extrusion: Silver; Vinyl Seal: Black
- Twenty—3/4" long 1/4" Hex head self-drilling screws

Benefits

- Helps to keep out drafts, wind driven rain and snow, dust, dirt and leaves, insects and rodents
- Sturdy aluminum extrusion
- Seal closes gaps up to 3/4"
- Durable vinyl seal stays flexible to -30°F
- Easy to install

Recommended Tools

1. Safety Glasses
2. Measuring tape
3. Hacksaw or jigsaw with blade for cutting aluminum

4. Drill and 1/4" driver bit or hex head socket wrench/hex driver
5. Scissors or cutting knife
6. Pencil

Installation Instructions

- Remove old seal from garage door.
- Measure underside of garage door and cut aluminum base and vinyl seal to correct length.
- Center the aluminum base on the garage door bottom and fasten into position with self-drilling screws.
- Slide vinyl seal into aluminum channels.
- Trim to length.
- Crimp Aluminum channel to hold seal in place.
- Added Note: For garage doors with guide rails: Slide one edge of vinyl into position before fastening aluminum base. Once fastened, insert inside flange of opposite rubber edge, and push outside flange into channel with screwdriver. Begin at either end of aluminum base.

Safety and Precautions

WARNING:
CHOKING HAZARD.
