- Self-Cleaning
- Recessed Broiler
Safe for your hands

WHERE HOME COOKING MEETS HAUTE CUISINE.

With the hottest in range innovations this freestanding electric double oven will help take your cooking to the next level. Enjoy the convenience of a large capacity double oven and the added versatility of the industry's tallest upper-oven. Save time and prepare juicier meats with InfraGrill System, LG's first infrared heating element. With so much cooking power your home cooking may become haute cuisine.

Tallest Upper Oven

LG provides you with the tallest upper oven in the industry, allowing you to bake and broil tall items in the smaller oven without having to preheat a big oven. The 6" height allows for easier access to insert or remove items from the oven.

InfraGrill System

LG's first infrared heating element gets your oven to broil temperature more quickly and cuts 30% off your cooking time on common items like hamburgers and chicken breasts. Infrared cooking – which uses the same technology as premium outdoor grills – also allows your food to be juicier than traditional thermal cooking.

Large Capacity

Cook two meals at once – Allows you to cook different dishes at different temperatures all at the same time. Gives you room for everything you'd need for a holiday dinner.
