

TFR150

DETAIL K2 INC.

## Combination Headache and Flip Rack

The TFR150 is 2 products in one

### Expect the unexpected.

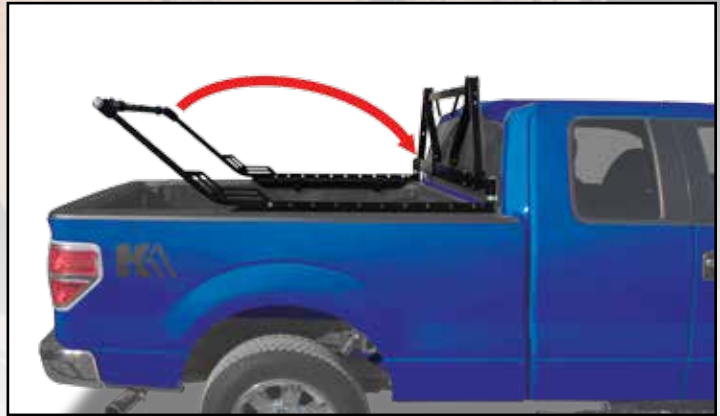

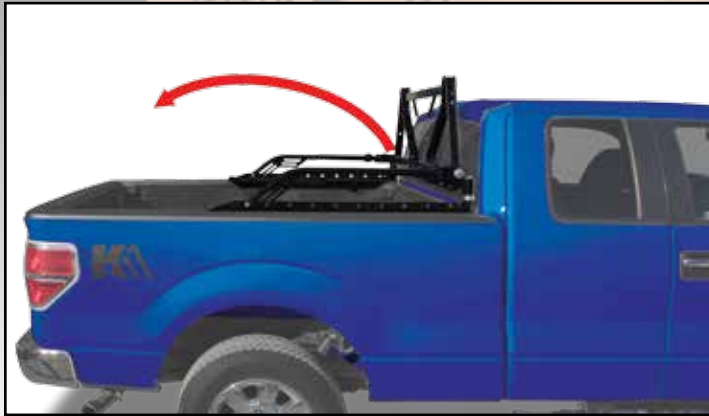

When you own a Pick Up Truck you know you're going to be asked to do just about everything. Carrying a full load of cargo in the back and suddenly need a ladder? Thanks to our TFR150 that's no longer a problem.

The TFR150 give you flexibility and combines the safety and security of a headache rack with the functionality of an elevated ladder rack. Installation takes minutes, requires no drilling and fits all trucks.

With a simple flip up and back of the crossbar the rack immediately gives you the ability to transport everyday things that require extra length. Ladders, pipe, lumber and even canoes all easily tie down fixed and secure on the upper deck. Once you're done the crossbar is easily flipped forward and down and secured back to its starting position against the headache rack.

Don't get caught unprepared. Order your new TFR150 today.

## Features

- Converts from a window guard into a full-length utility rack with a simple "flip" of a crossbar
- Strong and rigid: heavy-duty steel construction
- Cargo can be secured to window guard to prevent shifting loads
- Rack can support up to 225 kg / 500 lb. (distributed) in open position: ladders, lumber, etc.
- Fits most pickup trucks- min. bed width: 131.5 cm / 51-3/4"; height above bed rail: 55.9 to 61 cm/ 22" to 24"
- Easily installed and removed
- No drilling truck (clamps provided)
