

The easy way to remove existing attic insulation

This powerful, multi-purpose industrial vacuum removes all types of damaged or contaminated loose fill attic insulation (cellulose, fiber glass, rock wool).

In wall spray applications it can be used to return scrubbed or recycle material to the blowing machine for remix into the blend. Its ergonomic design and tubeless pneumatic tires makes it easy to maneuver. The reduced footprint saves valuable floor space in the truck. Optional hose, sleeves, clamps and vacuum wands are available.

Features & Benefits

- Powerful 14-horsepower engine
- Dual engine start methods
- 40% smaller footprint
- New ergonomic design
- Heavy duty impeller
- Pneumatic tires
- Removable front cover
- Replaceable inlet/outlet ports
- Optional accessories

Vac-Matic™
