PESTO SAUCE
3 cups packed tender basil leaves  3 heaping tbsp. pine nuts
1/2 cup extra virgin olive oil  3 garlic cloves, crushed/finely minced
1/2 cup freshly grated Parmesan

* Place the basil and pine nuts in a food processor or blender and process steadily while you add the oil in a thin but constant stream. The sauce should achieve the consistency of a slightly grainy paste but not a fine puree.
* Add the garlic and process very briefly, just to mix. When the sauce is the right consistency, transfer it to a bowl and using a spatula, fold in the Parmesan. If the sauce is too thick, work in more olive oil. Taste and adjust the seasoning.
* Pesto can be made ahead and stored in the refrigerator for a few days or in the freezer for a few weeks. If you plan to store it, leave the cheese out. Transfer the Pesto to a refrigerator container, pour a thin film of oil over the top, cover, and store. When you’re ready to use it, let the Pesto thaw if necessary, then stir in the oil on top and add the Parmesan.
**CLEANING**

The Pasta Machine and the Cutter Attachment may have some excess oil on it from the factory. This is to protect the machine during shipping. THIS OIL MUST BE REMOVED BEFORE USING THE MACHINE!

- Using a clean dry cloth, wipe all the surfaces clean. DO NOT USE WATER! Never wash the Pasta Machine or the Cutter Attachment with water, place it in water, or put it into the dishwasher. Simply wipe it clean with a dry cloth.
- To clean the inner surfaces of the Pasta Machine and the Cutter Attachment pass a piece of dough through the Rollers and Cutters several times, making sure the dough touches all the surfaces, especially the sides where machine oil can accumulate. Discard this dough when finished.
- Use a dry pastry brush to remove any flour or bits of dough from the hard to reach places.
- Lightly sprinkle some flour on the Rollers and Cutters. Using a dry brush, work the flour into the edges of the Pasta Machine and into the Cutter Attachment. Brush all the flour away and wipe the machine clean again with a clean, dry cloth.
- NEVER INSERT KNIVES BETWEEN THE ROLLERS OR THE CUTTERS!

**ASSEMBLY**

1. To attach the Pasta Machine to the table or countertop position the Pasta Machine near the edge of the work surface.

2. Slide the C-Clamp into the C-Clamp Hole in the side of the Pasta Machine.

3. Tighten the screw on the C-Clamp to secure the Pasta Machine to the table or countertop.

4. Slide the Cutter Attachment onto the attachment clip of the Pasta Machine.

5. Slide the Handle into the Drive Hole of the Roller or the Cutter Attachment to be used. Be sure to notice when the Handle turns, it passes below the edge of the work surface and turns freely.

**RAVIOLI**

**Half Moon Ravioli Additional Accessory Part # 01-0208**

**Square Ravioli Additional Accessory Part # 01-0209**

PLEASE NOTE: Ravioli Maker does not work with the Motor Attachment. The Ravioli Maker attachments produce evenly sized and shaped ravioli. You can make them using many different fillings. The most popular are meat and cheese but the possibilities are endless.

* Begin by preparing the filling of your preference. It should be rather soft to allow the pasta sheets to conform the filling without breaking.
* Attach the Ravioli Maker attachment to the pasta machine in the same manner as the other pasta attachments. Make sure the machine is well fastened to the table or counter. Attach the handle to the Ravioli Maker.
* Prepare a pasta sheet to the desired thickness. Dust lightly with flour. Let the pasta sheet rest until it is slightly dry.
* Trim the sheet to the proper width with the wheel cutter.
* Divide the sheet in two. This will give you two sheets of the same width and length.
* Place the two sheets on the wooden rollers of the hopper and turn the handle slowly, making sure both sheets are being pulled into the hopper. Test a short length to make sure the dough sticks together (if the sheets do not stick, lightly brush with an egg wash, if using a non-egg dough, use water).
* Spoon the filling in between the two layers of pasta into the cavities of the Ravioli Maker attachment. Do not place filling between the cavities or the sheets of pasta will not seal properly. Be careful not to put too much in, you want the pasta sheets to close around the filling without compressing it.
* Turn the handle slowly in a clockwise direction to seal the first row of ravioli. If the ravioli break, add less filling; if they seem flat or too empty add a little more filling.
* Allow the Ravioli to dry slightly before cutting them apart.
* Boil ravioli in plenty of salted water for approximately 4 to 5 minutes. After tasting to make sure they are adequately cooked, remove from the heat and drain.

**FAMILY SECRET RAVIOLI MEAT STUFFING**

Makes approximately 50 Ravioli

1 medium onion, finely chopped 1 extra large egg

1 Tbsp finely minced oregano 1/4 tsp ground pepper
10 oz (0.3 kg) chopped cooked greens of your choice
1 Tbsp finely minced oregano

* Film a large sauté pan with olive oil
* Over medium heat, add the chopped onion and sauté until limp but not brown, four or five minutes
* Add garlic and sauté another minute
* Crumble the beef into the pan and sauté until cooked and no red is visible
* Turn heat to high and boil away as much of the liquid thrown off by the beef as you are able to in 5 minutes
* Turn into a strainer and discard all fat and any liquid left
* Return meat mixture to sauté pan and add the chopped greens, parsley, oregano, salt and pepper
* Toss and stir until well combined and heated through, 3 or 4 minutes. Turn into a bowl to cool slightly
* Add egg and cheese and mix well
* Cover and chill at least one hour
* May be made up to one day ahead

**DOUGH INSTRUCTIONS**

**RECIPES FOR THE DOUGH WILL FOLLOW THESE INSTRUCTIONS. THESE INSTRUCTIONS START WITH FULLY MIXED DOUGH, READY TO BE USED.**

**STEP 1: ROLLING THE DOUGH**

1. Follow assembly instructions and insert the Handle into the Roller Drive Hole.

2. Locate the Regulator Knob on the left side of the Pasta Machine. The Regulator Knob is numbered 1-7. The number 1 setting is the narrowest setting; the number 7 is the widest setting for the Rollers. To adjust the Regulator Knob, pull out on the Knob and turn it to the desired setting. As you turn the Regulator Knob you will be able to see the Rollers moving closer together or further apart.

3. Lightly flour your work space.

4. With the Regulator Knob in the 7 position, turn the Handle clockwise while feeding a piece of dough into the Rollers. Once the dough has gone through the Rollers lightly flour it, fold it in half and run it through the Rollers again. Repeat this process several times: lightly flour, fold in half, run through Rollers.

5. As the dough exits the Rollers, it will get longer with each pass. Lay the strip of dough out flat on your work space.

6. Now set Regulator Knob to the “6” position. Run the dough through the Rollers. Repeat this process several times, each time setting the Regulator Knob to the next setting until the dough reaches the thickness you desire. If the sheet gets too long to manage, simply cut it with a knife.

7. After reaching the desired thickness, leave the sheet to rest for about 10 minutes so that it will dry slightly and be hard enough for cutting, without sticking to the Cutting Rollers.

**STEP 2: CUTTING THE PASTA**

1. Slide the Handle out of the Roller Drive Hole and into the Drive Hole of the Cutter Attachment to be used.

2. Cut a piece of rolled out dough long enough to be easily handled.

3. Lightly flour the sheet to prevent it from sticking to the Cutters.

4. While slowly turning the Handle, carefully start the dough into the Cutter Attachment.

5. As the cut noodles exit the machine, continue to carefully guide the dough into the Pasta Machine while slowly turning the Handle.

6. Lay your freshly cut noodles out on a lightly floured surface or on a drying rack to dry before cooking.
STEP 3: COOKING THE PASTA

Whenever cooking pasta, keep the following points in mind:

- Always use plenty of boiling water so the pasta does not stick...
- 1/2 lb (0.22 kg) of noodles will require at least 2 quarts of water, 1 lb (0.5 kg) of pasta will require 6 quarts.
- Add 1 tsp. of salt for each quart of water.
- Always bring the water to a full, rolling boil before adding pasta or it will not cook properly.
- Cooking time will vary based on the size, weight and ingredients of the noodles.
- Homemade noodles take very little time to cook and should be tested after 3-4 minutes.
- Pasta should be cooked Al Dente. This means it should not be mushy, but tender, yet slightly hard to bite. Test the pasta frequently to test for doneness.
- It is better that the noodles be slightly undercooked than overcooked.
- Once pasta is cooked, drain it but never rinse.
- For the best pasta dishes, add sauce to the drained noodles and serve immediately.
