Lakeland<sup>™</sup> blocks have the sophisticated look of an old brick wall so popular with homeowners today. This tumbled, three piece system offers designers the opportunity and freedom to combine functionality with style. Lakeland blocks can be used to build random-pattern outdoor fireplaces, kitchens, islands, garden and seat walls, pillars, planters, and more.

Size: 4" H x 8" W x 12" D Weight: 31 lbs Medium Block Size: 4" H x 8" W x 8" D Weight: 20 lbs.

Size: 4" H x 4" W x 8" D Weight: 10 lbs.

#### Copyright notice, please read:

The plans and instructions contained in this kit and the three-dimensional [24 Inch Pillar] design constructed from the use of this kit are protected under the U.S. Copyright Act. Reproduction of the plans, instructions or the [24 Inch Pillar] design, either in whole or in part, and whether in two-dimensional or three-dimensional form, and the creation of new works based upon such plans, instructions or [24 Inch Pillar] design, without the prior written permission of Rockwood Retaining Walls, Inc. is strictly prohibited. The purchase of a genuine kit from Rockwood Retaining Walls, Inc. or an authorized Rockwood dealer provides the purchaser with a limited license to construct a single [24 Inch Pillar]. Any reproduction of the plans and/or instructions, or the construction of more than a single [24 Inch Pillar] is a violation of Rockwood's copyrights and can result in severe penalties.

**Base Preparation:** Base can be constructed of either poured slab or compacted gravel. See requirements below.

**Zoning and Permits:** Before you plan your project, learn about the necessary zoning requirements and rules for excavating and building in your area. No matter how small your project, be sure you obtain the necessary permits before you start construction.

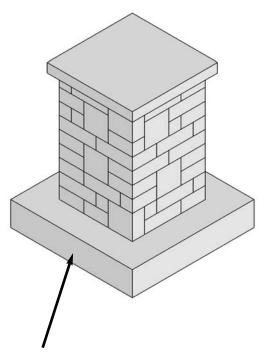

Know What's Below: Whether you are planning to do it yourself or hire a professional, smart digging means calling 811 before each job. Homeowners often make risky assumptions about whether or not they should get their utility lines marked, but every digging job requires a call – even small projects like planting trees and shrubs.

#### **Concrete Base Foundation:**

- 4" deep
- 4" outside perimeter of base
- Reinforce with 6" x 6" no. 10 WWM
- Compact sub-base soils to 95% of standard proctor (ASTM D698)

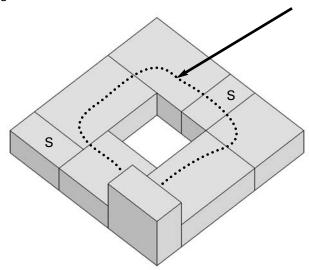

#### **Aggregate Base Foundation:**

- 6" deep
- 8" outside perimeter of base
- Compact sub-base soils to 95% of standard proctor
- Compact aggregate base to 95% of standard proctor (ASTM D698)

Be sure your properly prepared base is level. Begin building by laying your base course as shown.

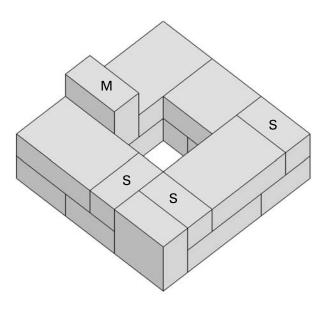

Using a stiff brush, remove all debris and dust from each block surface to be glued.

IMPORTANT: Lay glue bead away from outside perimeter to prevent glue from squeezing out between courses

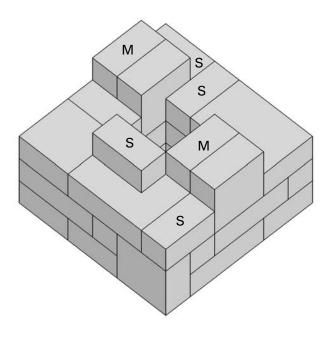

## Course 2

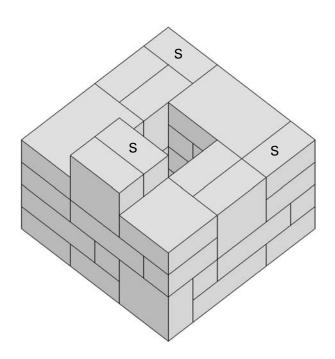

Continue to build each course as shown. Use adhesive on each block.

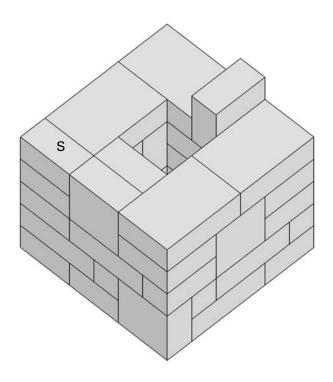

IMPORTANT: Use Super-Stik adhesive on each course. Brush excessive dust from blocks to be glued.

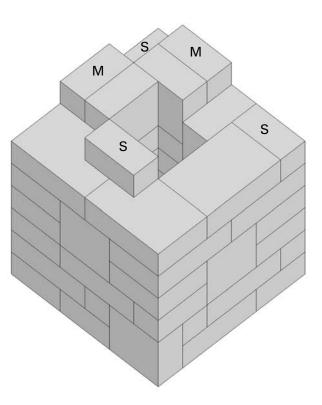

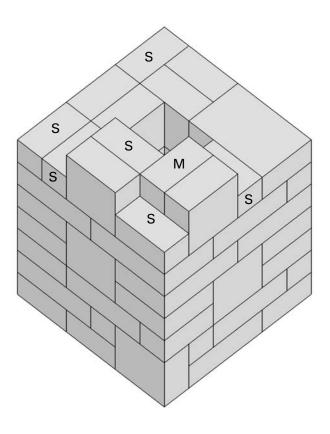

Course 4

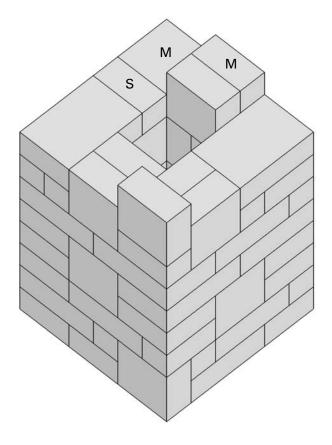

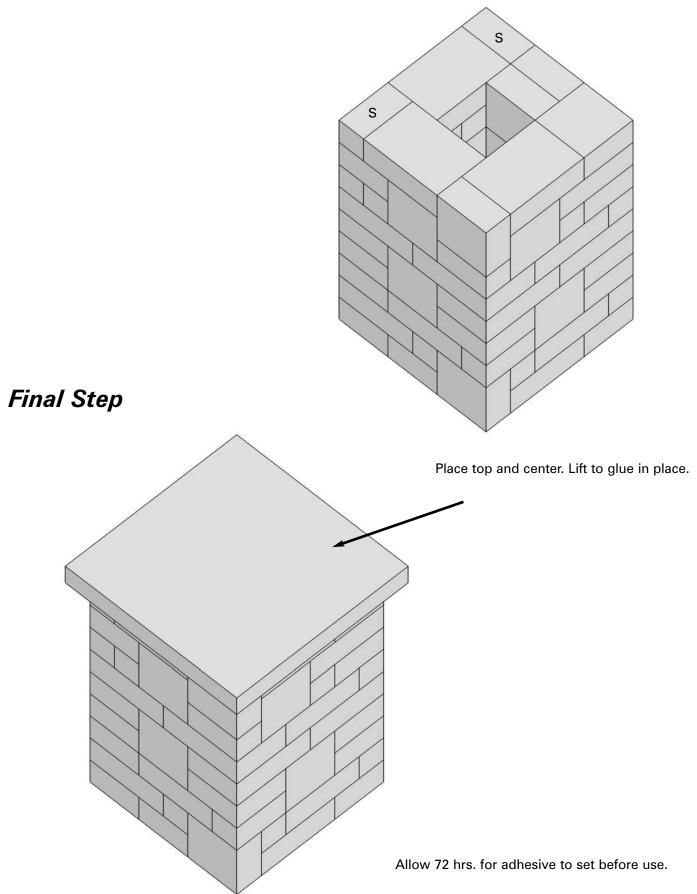

Course 6

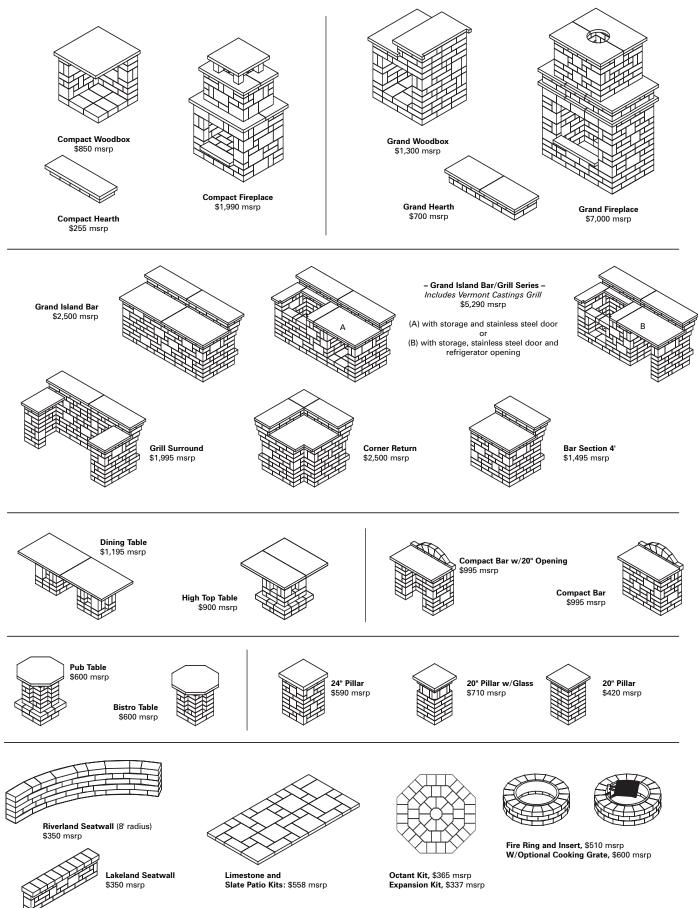

Course 8
