

Charisma

The **Charisma Shower Door** has a unique "no wall profile" design, combining the beauty of frameless glass and the convenience of a sliding bypass operation. Both shower door panels slide effortlessly across perfectly engineered rails, so you can enter the shower space from either side. Unlike the Charisma, most bypass shower doors require significant aluminum framing. Lose the aluminum and discover the sleek look of a frameless glass design.

Charisma is also available as a **tub door**.

Features:

- Frameless glass sliding bypass shower door
- 5/16" (8mm) thick tempered clear glass
- Chrome or brushed nickel hardware finish
- Two convenient towel bars
- Unique "no-wall profile" design creates a frameless look
- Anodized aluminum guiderails
- Width may be trimmed up to 4"
- No adjustment for out-of-plumb walls
- Optional SlimLine™ shower base and backwalls available
