

JELD-WEN® TURTLE GLASS

For Homes in Sea Turtle Protection Zones

JELD-WEN® Premium Atlantic windows and patio doors are available with glass meeting the Marine Turtle protection act requirements.

This specially designed glass features:

- Non-reflective coating to reduce visible light sources that can mislead baby sea turtles away from the ocean
- Impact protection from wind-borne debris and harsh weather conditions
- Energy efficient qualities to help keep your home comfortable year round

Did you know?

Every year, adult female turtles must return to beaches on which they were born to lay their eggs. After hatching, baby turtles will emerge at night and move toward the ocean. During this time it is critical that the hatchlings are not misdirected by artificial light sources.

Turtle glass features a non-reflective coating that reduces the light reflectance and helps shield light sources. This helps prevent newly hatched sea turtles from migrating towards artificial light instead of the moon and the sea.
