

# Demand The Best

## Eco Red Shield™

Finally, cost-effective protection for lumber's hidden enemies.

Our lumber is protected against mold, wood rot, termites and fire by our proprietary eco-friendly chemistry – dramatically increasing the life of the lumber and safety of the home being built.

Our Eco Red Shield™ is available for all wood products, just ask your Home Depot Associate.

# Benefits of Eco Red Shield™

**Eco Red Shield™ protected wood is extraordinary wood.** Protected by an eco-friendly solution that is applied to all dimensional building lumber, engineered wood products and sheathing. This coating is also a very effective exterior primer – protecting lumber from moisture, mold, termites and fire in the process.

**MOLD    TERMITES    WOOD ROT    FIRE**

**Eco Red Shield™ is GREENGUARD® Certified.**

Safe around children, your family and in your home.

# Eco Red Shield™ Products

## Dimensional Lumber

All sizes of dimensional framing lumber from 2x4's all the way up to beams and joists – with six sided protection to last a lifetime.

## Exterior Trim & Pattern Corbels

Exterior trim including deck and patio material, pattern corbels and handrails. Designed specifically for solid body stains and paints. Eco Clear Shield is available for transparent stains and a natural look.

## Plywood & OSB

Plywood and OSB are traditionally among the most vulnerable to de-lamination, moisture, mold, termites and fire, but Red Shield treated plywood and OSB are protected against these problems.

## Engineered Wood Products (EWP)

Finally protection is available for EWP's from the enemies of mold, wood-rot decay, termites and fire. Until now most EWP's were not able to be protected due to the intrusive properties of pressure treatment. Eco Red Shield protection has no effects on the wood fiber strength or delamination of Engineered Wood Products. Typically EWP's provide structural strength, these are the most critical components of your home to be protected. Eco Red Shield topically applied coatings have been approved by most EWP manufacturers.

All specified EWP's or equivalent can be special ordered.

**All Eco Red Shield™ wood components are available for special order.**

Eco Red Shield™ Coatings meet building code requirements. Evaluation report ESR 3255 was granted by the ICC-ES providing evidence that Eco Red Shield™ meets building code requirements for wood ingesting organism including Formosan termites and wood rot fungal decay as applied to all wood members / applicable for use in applications requiring AWPA UC1, UC2 and UC3a certifications. Eco Red Shield™ Coatings have been tested to meet Class A certifications for fire in accordance with ASTM E84 surface burning characteristics. Other certification related information can be found at [www.ecob.net](http://www.ecob.net)
