

Aspire design collection

What is Aspire?

Aspire's award-winning, unique and sophisticated appearance becomes an integral element of interior design while providing precise, adjustable lighting controls to create a sense of ambience and reduce energy costs.

Aspire products

Dimmers

Turn lights ON and OFF and adjust the light intensity to create the right mood for any occasion.

Switches

Available in three distinctive, two-tone color combinations: White Satin, Desert Sand and Silver Granite, plus single-tone Alpine White.

Timers

Easily programmable to alternate time intervals to suit your needs. Available in both hours and minutes versions. LED indication of time interval selected and countdown.

Screwless wallplates

Designed to coordinate with both the Decorator and Designer color series, wallplates appear to float freely on the surface of the wall, framing every device beautifully.

Designer series color options:

| | | | |
|----------------|----|-------------|----|
| AW | AW | DS | DS |
| Alpine White | | Desert Sand | |
| SG | SG | WS | WS |
| Silver Granite | | White Satin | |

Aspire RF offers customizable, energy saving technology that will improve your lifestyle

What is Aspire RF?

Aspire RF provides intelligent wireless control of the light in and around your home - at the touch of a button. Set the mood for family movies, entertaining friends, or a romantic dinner to match your lifestyle. Control lighting as well as appliances to help reduce energy costs.

Powered by Z-Wave®

Aspire RF uses Z-Wave®, a home control technology that operates at 908 MHz radio frequency. All Aspire RF products are certified to be compatible with other manufacturers' Z-Wave products, such as door locks, shades and security panels.

Communication

Aspire RF devices (dimmers, switches, outlets), controllers and accessories form a mesh network, with all products communicating with each other. The signal range is up to 60 feet with each device repeating the signal to extend coverage to the entire house ensuring a strong network in which every command is carried out instantly.

New & Retrofit Solutions

Aspire RF does not require new wiring. It can simply replace your existing electrical devices, making it ideal for retrofitting an existing home and new home construction. The system is expandable, allowing you to upgrade a room or add more devices at any time.

Award-Winning Style

Aspire RF is available in 2 distinct styles: the traditional straight edge decorator series and the uniquely-curved designer series.

Aspire RF products

Controller

Control the devices, scenes and events within the home with a handheld or table top controller or access it remotely from a tablet or smartphone using a home controller (RFTCP) with an internet connection.

Scene Controller

Wallmount keypad offers ON/OFF/DIM functionality for 5 scenes or zones. The ALL OFF button turns off all devices associated with all 5 scenes.

Dimmer

Turn lights ON and OFF and adjust the light intensity to create any mood or environment. The RF dimmer can control up to 5 other RF devices allowing multiple dimmers to be wirelessly paired together to control the same lights.

Switch

The 15A switch can control up to 5 other RF devices allowing multiple switches to be wirelessly paired together to control the same lights or an RF receptacle.

Receptacle

The RF receptacle has 1 RF-controlled outlet and 1 traditional live outlet. Pair the RF outlet with an RF switch to conveniently control a plug-in lamp or plug in a coffee maker and program an event to turn it on at 6 AM.

Need a **Switch** where one doesn't exist?

Easily install a switch wherever it's needed without adding wire

One **Switch**. Many solutions.

Anyplace RF battery operated switch

- Count on saving time and money** by adding a switch wherever you need it without additional wiring
- Count on expandability** with the anyplace RF battery operated switch by pairing with other RF switches, dimmers and receptacles, eliminating the need for a separate controller
- Control up to 5 RF devices** in existing Z-Wave networks or as a stand-alone controller
- Conveniently mounts** on any surface, anywhere you need it
