- Strong, plastic-coated, brown canvas with weather-resistant, powder-coated metal legs
- Eye-catching, full-color packaging:
 - Comes with all information required to grow a successful garden

**Unfolds
Quickly
To Use!**

EASY GARDENER® INSTANT GARDEN brings the successful "raised garden" concept to a new level with a unique "Pop-Up" design structure. Similar to a collapsible lawn chair, this new garden table allows urban consumers with limited outdoor spaces to quickly and easily set up a garden without using any tools or complex assembly. Now, it is easy to grow flowers, salad vegetables, herbs and other plants in a distinctive, small-footprint structure. And, when the gardening season is over, the durable metal frame and plastic-coated canvas garden folds down for easy winter storage. Designed with a 30" counter-top height, this raised container allows consumers to garden without bending or kneeling. Its low height is wheelchair accessible, making it ideal for senior citizens. And, the full-color carton contains all the information required to begin growing a successful garden. Easy Gardener Instant Gardens—The 'Grow Anywhere' Instant Gardening Solution!
