

# TILELAB®

## GROUT HAZE REMOVER

- Removes grout haze and mortar residue
- Dissolves efflorescence
- No dangerous fumes

### PRODUCT DESCRIPTION

Pre-mixed, ready-to-use mild acid solution. Removes dried Portland cement grout haze and mortar residue from tile, concrete and masonry. Safe for use on colored grouts. Removes hard water deposits, efflorescence and also etches concrete.

### USES

Grout Haze Remover is used for removal of dried Portland cement grout and mortar residue from the surface of glazed and unglazed ceramic tile, concrete and masonry. It is ideal for neutralizing efflorescence. It can also be used to slightly etch concrete surfaces to create a better bond for adhesives.

### LIMITATIONS

Grout Haze Remover may etch some glazed tile. Do not use on marble or polished stone. Do not allow product to contact metal objects. Do not transfer contents to unlabeled containers.

### SURFACE PREPARATION

Concrete surfaces and Portland cement grouts should be cured a minimum of 10 days and be free of surfaces oil or grease deposits. Saturate all concrete, masonry and cement grout joints with clean water for one hour prior to application. Leave a film of water over the surface immediately prior to acid wash to prevent acid burn or loss of pigmentation to colored concrete and cement grouts.

### APPLICATION

Follow surface preparation instructions. Surface must be saturated with water at least one hour prior to acid solution application. Avoid contact with metal. Scrub surface with a nylon bristled brush after applying solution. Work in small areas only. Flush with water immediately after brushing surface. Do not allow solution to set longer than is necessary for brushing to be completed on Portland cement grout, glazed ceramic and unglazed quarry tile or masonry installations. Wash thoroughly with water as soon as brushing is completed. Do not use repeated acid washings as damage to surface may result. For heavy concrete etching, solution may be allowed to set on surface of concrete for up to 30 minutes prior to flushing with clean water.

### COVERAGE

1 quart (946 ml) of Grout Haze Remover will clean an approximately 75 sq. ft. (7 sq. m) area.

### CAUTION

Keep out of reach of children. Do not take internally. Contains Glycolic Acid. Use only with adequate ventilation. If swallowed, immediately drink 1 or 2 glasses of water and call a physician or poison control center. Avoid breathing of dust or contact with skin or eyes. Wear rubber gloves and eye protection. Use respirator if necessary. In case of eye contact, immediately flush with water and call a physician. For skin contact, wash thoroughly. Do not transfer contents to unlabeled containers. Close container after each use.
