SAFETY PRECAUTIONS

Read all of the instructions before using this appliance. When using this appliance, always exercise basic safety precautions, including the following:

- 1) Use this appliance only for its intended purpose as described in this use and care guide.
- 2) This refrigerator must be properly installed in accordance with the installation instructions before it is used. See grounding instructions in the installation section.
- 3) Never unplug your refrigerator by pulling on the power cord. Always grasp the plug firmly and pull straight out from the outlet.
- 4) Repair or replace immediately all electric service cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length, the plug or the connector end.
- 5) Unplug your refrigerator before cleaning or making any repairs.
Note: If for any reason this product requires service, we strongly recommend using a certified technician to perform the service.
- 6) Do not use any electrical device or any sharp instrument in defrosting your refrigerator.
- 7) If your old refrigerator is not being used, we recommend that you remove the doors and leave the shelving in place. This will reduce the possibility of danger to children.
- 8) After your refrigerator is in operation, do not touch the cold surfaces in the freezer compartment, particularly when hands are damp or wet. Skin may adhere to these extremely cold surfaces.
- 9) Do not refreeze foods, which have been thawed completely as the United States Department of Agriculture in Home and Garden Bulletin No. 69 reads: "You may safely refreeze frozen foods that have thawed if they still contain ice crystals or if they are still cold-below 40°F.

"...Thawed ground meats, poultry, or fish that have any off-odor or off-color should not be refrozen and should not be eaten. Thawed ice cream should be discarded. If the odor or color of any food is poor or questionable, discard it. The food may be dangerous to eat.

"...Even partial thawing and re-freezing reduce the eating quality of foods, particularly fruits, vegetables, and prepared foods. The eating quality of red meats is affected less than that of many other foods. Use

refrozen foods as soon as possible, to save as much of its eating quality as you can.”

- 10) This refrigerator should not be recessed or built into an enclosed cabinet. It is designed for freestanding installation only.
- 11) Do not operate your refrigerator in the presence of explosive fumes.

Save These Instructions For Future Reference

DANGER

Risk of child entrapment. Before you throw away your old appliance, take off the doors. Leave the shelves in place so that children may not easily climb inside.

Thank you for using our Haier product. This easy-to-use manual will guide you in getting the best use of your refrigerator.

Remember to record the model and serial number. They are on a label in back of the refrigerator.

PARTS AND FEATURES

1. Freezer Compartment
2. Ice Cube Tray
3. Full Width Shelf
4. Storage Shelf

5. Drip Tray
6. Temperature Control
7. 2-Liter Bottle Door Storage
8. Adjustable Leveling Legs

INSTALLING YOUR REFRIGERATOR

Unpacking Your Refrigerator

1. Remove all packaging material. This includes the foam base and all adhesive tape holding the accessories inside and outside.
2. Inspect and remove any remains of packing, tape or printed materials before powering on.

Proper Air Circulation

- To assure your refrigerator works at maximum efficiency, you should install it in a location where there is proper air circulation, plumbing and electrical connections.
- The following are recommended clearances around the refrigerator:

Sides.....	3/4" (19mm)
Top.....	2" (50mm)
Back.....	2" (50mm)

Electrical Requirement

- Make sure there is a suitable power outlet (115 volts, 15 amps outlet) with proper grounding to power the unit.
- Avoid the use of three plug adapters or cutting off the third grounding in order to accommodate a two plug outlet. This is a dangerous practice since it provides no effective grounding for the unit and may result in shock hazard.

Use of Extension Cord

- Avoid the use of an extension cord because of potential safety hazards under certain conditions. If it is necessary to use an extension cord, use only a 3-wire extension cord that has a 3-blade grounding plug and a 3-slot outlet that will accept the plug. The marked rating of the extension cord must be equal to or greater than the electrical rating of the appliance.

Installation Limitations

- Do not install in any location that is not properly insulated or heated (e.g. garage etc.). Your unit was not designed to operate in temperature settings below 55° Fahrenheit.
- Select a suitable location on a hard, even surface away from direct sunlight or heat source (e.g. radiators, baseboard heaters, cooking appliances etc.). Any floor unevenness should be corrected.

Door Alignment (see fig. #1)

1. Remove hinge cover screw.
2. Remove the top hinge cover.
3. Loosen the top hinge screws using a hillips head screwdriver.
4. Adjust the door or put a spacer in between and tighten the screws.
5. Replace the top hinge cover.

Reversing the Door Hinge

1. Remove the top hinge cover screw and then remove the top hinge cover. (see fig. #1)
2. Using a Phillips Head Screwdriver, loosen and remove the screws holding the top hinge in place. (see fig. #1)
3. Remove the top hinge and carefully lift off the door.
4. Carefully remove the top screw hole plug from the opposite side and insert the plug in the screw hole openings of the just removed screws. (see fig. #2)
5. Remove the door pin from the bracket of the lower hinge by turning counter clockwise. Move the pin to the opposite hole and tighten. (see fig. #3)
6. Loosen the screws holding the lower hinge bracket and remove the hinge. Remove the two screws from the non-hinge side. (see fig. #3)
7. Align the holes in the lower hinge bracket to the corresponding holes in the opposite side of the cabinet. Insert and tighten the screws. Insert the two remaining screws into the holes of the side opposite the current hinge location. (see fig. #3)
8. Align the bottom hole on the left side of the door with the pin of the lower hinge and slide into place.

fig. # 2

9. Align the pin of the top hinge with top hole on the left side of the door and push into place. Replace the screws in the upper hinge bracket but do not tighten all the way. (see fig. #1)
10. Make sure the door closes easily but forms a tight seals. Adjust the door as needed. (See Door Alignment Section) Once you are satisfied with the door alignment, completely tighten the upper door hinge screws.
11. Replace the hinge cover, insert the screw and tighten completely. (see fig. #1)
12. If the door does not close properly, refer to the section titled "Door Alignment."

REFRIGERATOR FEATURES AND USE

General Features

Adjustable temperature dial:

- Once the unit is in its proper place, plug it in an electrical outlet having 115 volts and 15 amps. Turn on power switch. Green light will come on indicating that the unit is in operation.
- Choose the refrigerator or freezer setting.
- Set the temperature, on the temperature control knob. "1" being the warmest and "4" being the coldest. Initially set the temperature on "2". Place food inside. After using for 24 hours set to your desired setting.
- In case you unplug your unit or experience an electrical outage, allow 5 minutes before plugging it back in.

(Note: If the refrigerator has been placed in a horizontal or tilted position for any period of time, wait 24 hours before plugging the unit in)

Refrigerator Interior Shelves

To remove or replace a full-width slide-out shelf: (see fig. # 2)

1. Gently tilt the shelf up and slide forward until the shelf has been completely removed.
2. To replace the shelf, gently slide the shelf back.

fig. # 2

Defrosting Your Refrigerator

- For maximum energy efficiency, defrost freezer section whenever frost accumulates to a thickness of 1/4" or more on freezer walls. Note that frost tends to accumulate more during the summer months
- To defrost freezer, remove food and ice cube tray from the freezer section. Place drip tray under freezer section and turn temperature control dial to OFF position. Defrosting may take a few hours. To speed up defrost time, keep the door open and place a bowl of warm water in the refrigerator.
- During the defrost cycle, water will accumulate in the drip tray. The drip tray may also need to be emptied during the defrost process. Do not leave unattended. (see fig. 3)
- After defrosting, empty and wipe down the drip tray, as well as the interior of the refrigerator. You may now reset your refrigerator to the desired temperature and return food.

fig. # 3

FOOD STORAGE INFORMATION

Fresh Food:

- When storing fresh food, which is not prepackaged, be sure to wrap or store food in airtight and moisture proof material unless otherwise noted. This will ensure proper shelf life and prevent the transfer of odors and tastes.
- Whip containers before storing to avoid needless spills.
- Eggs should be stored in an upright position in their original carton to maximize shelf life.
- Fruit should be washed and dried then stored in sealed plastic bags before storing in the refrigerator.
- Vegetables with skins should be stored in plastic bags or containers.
- Leafy vegetables should be washed and drained and then stored in plastic bags or containers.
- Hot food should be allowed to cool before storing in the refrigerator. This will prevent unnecessary energy use.
- Fresh seafood should be used the same day as purchased.
- When storing meats in the fresh food section, keep in the original packaging or rewrap as necessary. Follow the suggestions below for safe storage:
 - Chicken 1-2 Days
 - Ground Beef 1-2 Days
 - Cold Cuts 3-5 Days
 - Steaks/Roasts 3-5 Days
 - Smoked/Cured Meats 7-10 Days
 - All others 1-2 Days

Normal Operating Sounds You May Hear

- Boiling water, gurgling sounds or slight vibrations that are the result of the refrigerant circulating through the cooling coils.
- The thermostat control will click when it cycles on and off.

PROPER REFRIGERATOR CARE AND CLEANING

Cleaning and Maintenance

Warning:

- To avoid electric shock always unplug your convertible freezer / refrigerator before cleaning. Ignoring this warning may result in death or injury.

Caution:

- Before using cleaning products, always read and follow manufacturer's instructions and warnings to avoid personal injury or product damage.

General:

- Prepare a cleaning solution of 3-4 tablespoons of baking soda mixed with warm water. Use sponge or soft cloth, dampened with the cleaning solution, to wipe down your convertible freezer / refrigerator.
- Rinse with clean warm water and dry with a soft cloth.
- Do not use harsh chemicals, abrasives, ammonia, chlorine bleach, concentrated detergents, solvents or metal scouring pads. SOME of these chemicals may dissolve, damage and/or discolor your convertible freezer / refrigerator.

Door Gaskets:

- Clean door gaskets every three months according to general instructions. Gaskets must be kept clean and pliable to assure a proper seal.
- Petroleum jelly applied lightly on the hinge side of gaskets will keep the gasket pliable and assure a good seal.

Power Interruptions

- Occasionally there may be power interruptions due to thunderstorms or other causes. Remove the power cord from AC outlet when a power outage occurs. When power has been restored, replug power cord to AC outlet. If outage is for a prolonged period, inspect and discard spoiled or thawed food. Clean unit before reusing.

Vacation and Moving Care

- For long vacations or absences, empty food, move the temperature dial to the OFF position and clean the door gaskets according to "General Cleaning" section. Prop doors open, so air can circulate inside. When moving always move vertically. Do not move with the unit lying down. Possible damage to the sealed system could occur.

TROUBLESHOOTING

Refrigerator Does Not Operate:

- Check if thermostat control is not in the "OFF" position.
- Check if unit is plugged in.
- Check if there is power at the AC outlet, by checking the circuit breaker.

Food temperature appears too warm:

- Frequent door openings.
- Allow time for recently added warm food to reach set temperature.
- Check gaskets for proper seal.
- Adjust temperature control to colder setting.

Food temperature is too cold:

- If temperature control setting is too cold, adjust to a warmer setting and allow several hours for temperature to adjust.

Refrigerator runs too frequently:

- This may be normal to maintain constant temperature during high temperature and humid days.
- Doors may have been opened frequently or for an extended period of time.
- Check gasket for proper seal.
- Check to see if doors are completely closed.

Moisture build up on interior or exterior of the refrigerator:

- This is normal during high humidity periods.
- Prolonged or frequent door openings.
- Check door gaskets for proper seal.

Refrigerator has an odor:

- Interior needs cleaning.
- Foods improperly wrapped or sealed are giving off odors.

Refrigerator door does not shut properly:

- Re-align refrigerator door.
- Check for blockages, e.g. food containers, crisper cover, shelves, bins etc.

LIMITED WARRANTY

What is covered and for how long?

This warranty covers all defects in workmanship or materials for a period of:
12 months labor (carry in service)
12 months parts (carry in service)
5 years sealed system (carry in service)

The warranty commences on the date of item purchased and the original purchase receipt must be presented to the authorized service center before warranty repairs are rendered.

EXCEPTIONS: Commercial or Rental Use warranty

90 days labor (carry-in only)

90 days parts

No other warranty applies

What is covered:

1. The mechanical and electrical parts of the appliance which serve the functional purpose of this appliance are covered for a period of 12 months. This includes all parts except finish and trim.
2. The components of the sealed system, (e.g. hermetic compressor, condenser and evaporator) are covered for a period of 5 years from the date of purchase. Any damages to such components caused by mechanical abuse, improper handling or shipping will not be covered.

What will be done?

1. We will repair or replace, at our discretion, any mechanical or electrical part which proves to be defective in normal usage during the warranty period so specified.
2. There will be no charge to the purchaser for functional replacement parts and labor on any covered items during the initial 12 month period. Beyond this period, only the components of the sealed system are covered, labor is not provided and must be paid for by the customer.
3. To have your product serviced, please contact Haier customer service 1-877-337-3639.

THIS WARRANTY COVERS APPLIANCES WITHIN THE CONTINENTAL UNITED STATES, PUERTO RICO AND CANADA.IT DOES NOT COVER THE FOLLOWING:

Damages from improper installation.
 Damages incurred during shipping.
 Defects other than manufacturing.
 Damage from misuse, abuse, accident, alteration, lack of proper care and maintenance or incorrect current or voltage.
 Damage from other than household use.
 Damage from service by other than an authorized dealer or service center.
 Decorative trims or replaceable light bulbs.
 Transportation and shipping.
 Labor (after the initial 12 months).
 Credit or Refund for products over 30 days past date of purchase
 Food loss for food spoiled as a direct result of mechanical failure of the product or of any delay in providing service, repair, replacement.

This limited warranty doesn't apply to refurbished product or unit purchased as/like new or second-hand.

THIS LIMITED WARRANTY IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

The remedy provided in this warranty is exclusive and is granted in lieu of all other remedies.

This warranty does not cover incidental or consequential damages, so the above limitations may not apply to you. Some states do not allow limitations on how long an implied warranty lasts, so the above limitations may not apply to you. This warranty gives you specific legal rights, and you may have other rights, which vary from state to state.
