

# Cineplex Popcorn Machine

## New 4oz. Consumer Friendly Popcorn Machine!

The Cineplex Popper features a brilliant textured finish desired by many. Designed for use in today's home theater and gaming rooms, the Cineplex is the perfect combination of quality and convenience only found in Paragon's made in America popcorn machines!

- Brilliant textured color featuring a pitted, powder coat material treatment that is all the rage in high-end home accents.
- Designed with the home user in mind we placed the cord in the back and the graphics and storage door facing the operator. No brainers that make this a great consumer product!
- Matching brilliant textured stand built to fit for a custom "single unit" look has a wrap around door.

- Pops 92 one-ounce servings per hour
- High output, hard coat anodized aluminum kettle - easy to clean
- Sturdy steel cabinet construction
- Stainless steel food zone and tempered glass panels
- Old maid drawer & built in warming deck
- Presentation lamp

Comes in 3 colors and styles.  
Choose between Red, Yellow or Antique Copper.

**LIFETIME Warranty - All of our 4 oz. popcorn machines are covered with a limited lifetime warranty - the best in the business.**  
Residential use only. Excluding Thrifty Pop and Gatsby.

# Features

## **High-output, Hard-coat Anodized Aluminum Kettle**

Poppers feature high output, hard-coat anodized aluminum kettles for optimum performance and easy cleaning. We only use aluminum because it has the highest heat transfer rate of any approved cooking material. Then we hard-coat anodize the kettles to create a non-stick surface that's a snap to clean – just wipe with a damp cloth.

## **Side-hinged Kettle**

Our side-hinged kettles are simple to operate and maintain. This design facilitates routine cleaning because you can reach all parts of the kettle. Just wipe it with a damp cloth regularly and you'll eliminate most of the baked-on carbon that is so common in oil-based cooking appliances. With less carbon build-up, your machine will heat faster and work more efficiently. Ordinary poppers with center pivot kettles build up baked-on carbon quickly and require time-consuming, difficult disassembly for cleaning.

## **Sturdy Cabinet Construction**

Our cabinets feature aluminum extruded side post construction so they have superior structural integrity. The extrusions are designed to withstand heavy commercial use without damage. Channels inside the side posts protect wiring from oil residues that cause electrical shorts and operation interruptions. Tempered glass side panels slide right into the channels. All metal on the cabinet is finished with powder-coated paint that resists chipping.

## **Stainless Steel Foodzone and Tempered Glass Panels**

The stainless steel bottom trays, drop doors and old-maid drawers are removable for quick cleaning. Just put them in the dishwasher or hand wash them with any mild detergent. Tempered glass side and back panels are designed for safety and easy cleaning – just wipe with a standard glass cleaner.

## **Built-in Warming Deck**

All of our Theater Pop line of poppers incorporate 50-watt heating elements underneath the bottom tray. Since heat rises, bottom heating is better than heat lamps that only warm the top layer of popcorn. Our bottom-heating element keeps all the popcorn in the cabinet warm and at the ideal serving temperature. Depending on the humidity level, popcorn can stay fresh all day if kept at the right temperature.

## **Old Maid Drawer**

A stainless steel drawer built into the base of the popper collects the unpopped kernels, or "old maids." The small holes in the tray allow the old maids to fall through, while keeping the fully popped corn in the serving cabinet. It's simple to remove the drawer for emptying and cleaning.

## **Presentation Lamp**

A 50-watt R20 lamp lights the cabinet interior and highlights the popped corn for added impulse sales. The light also provides extra safety and convenience because the operator can see the kettle clearly for loading and unloading.
