

Corner Bead Corner-rite inside Lath GZ 3" x 3" x 8'
Corner Bead Expanded Metal lath accessory provides reinforced inner corners for stucco

SEMCO Item # 10509 Corner Bead Corner-rite I/S Lath GZ – 3" x 3" x 8' stucco

Description: Corner Bead Corner-rite inside angle lath is an expanded galvanized steel lathing that is used in corners where walls intersect with walls or ceilings. The reinforcing of corners helps prevent cracks and provides reinforcement for stucco and plaster at inside corners.

Installation: Corner Bead inside Lath Expanded metal lath trims provide reinforcement for stucco or plaster inside corners.

Corner expanded metal lath provides a snug fit inside 90 degree corners with flanges tight against the stucco base. The product may be easily attached to metal lath by tie wire 8" O.C.

Features: Superior protection and finishing for inside corners, and angles.

- Large 3" expanded lath flange widths for flexible application
- Made of corrosion-resistant, expanded metal galvanized steel
- Pre-shaped to 105 degrees for a snug inside corner fit.
- Expanded metal lath Provides excellent stucco or plaster keying

Material; This product is made from expanded metal lath galvanized coated steel for added corrosion protection.

- Available in 8' length, for stucco
- 75 pieces per carton,
