Notes

Measure your actual product for roughing-in details.

Install this product according to the installation guide.

Double studding is recommended for pivot shower door installations.

Product is designed to be used with a single-hole mixer valve with an escutcheon cover not to exceed 7-3/4" (197 mm) in width.

Studs should be positioned roughly as shown.

Bath cannot be installed without the wall surround.

Width of back wall at the top transitions from 60° (1524 mm) at the front to 59-3/8" (1508 mm) in the back corners. Furring strips approximately $\frac{1}{4}$ " (6 mm) thick should be used at the back corner studs if drywall is to be installed over the nailing flange.

ADA compliant when installed to the specific requirements of these regulations.
