

EVlink™ charging station

Protection

- Highest level of user protection.
- Ensure your car continues to charge after a power outage or fault with auto restart feature.

Interface

- User-friendly LED display shows if the vehicle is charging and for how long it has charged.
- Stop button and indicator lights identify if the charger is ready to use or requires attention.
- Delay button and indicator lights display if charging has been programmed for a later time and length of the delay.

Enclosure

- Clean, modern design.
- Easily mounts on stud, drywall, or masonry wall.

Cable holder

- Independently mounted holder provides convenient install flexibility.
- Supports and helps organize the cable.

Connector and cord

- Connects to any electric vehicle.
- 18 ft cable (5.5 meters).

Call 1-800-HOMEDEPOT and enter code 267
