## A DECISION YOU'LL LOVE TO MAKE

Wouldn't you choose a cycle that gives you cold-water savings with warm-water performance? Wouldn't you be surprised by a technology that automatically customizes washing motions to ensure a better clean, no matter the load? And, wouldn't you find extra comfort in an allergen-fighting cycle that can kill over 95% of the most common household allergens? We think you most certainly would.

**COLDWASH™** ColdWash™ Technology  
Now using the cold cycle on your washer doesn't mean compromising how clean your clothes are. New ColdWash™ technology uses cold water and enhanced washing motions to penetrate deep into fabrics, giving you cold water savings with warm water performance.

**6MOTION™** 6Motion™ Technology  
Get your clothes cleaner and help them last longer with revolutionary 6Motion™ Technology. Each wash cycle combines up to 6 different wash motions to provide outstanding cleaning while being gentle on fabrics.

**Allergiene™ Cycle**  
The Allergiene™ cycle uses the power of steam to gently remove over 95% of common household allergens, like dust mites and pet dander, from even the most delicate fabrics. Now doing the laundry may save some sniffles.
