

QUICK CONNECT SYSTEM

The input power is supplied to the outdoor unit (wire harness supplied).

The indoor unit draws its power from and communicates with the outdoor by a series of wires. These wires are all contained in a single wire harness that is pre-wired to the indoor unit. Attached to the end of this wiring harness is a Quick-Connect terminal, which connects to its corresponding terminal located in the electrical panel of the outdoor unit. This Quick-Connect system substantially reduces installation time.
