

# create an outdoor theater

Screen your favorite movies under the stars. From kids' flicks to summer blockbusters, everything's more fun outdoors

# create an outdoor theater

## MATERIALS

- White canvas painter's tarp
- Grommets
- Bungee cords
- River rocks
- Projector (301934)

## TOOLS

- Grommet punc
- Ladder

## SKILL LEVEL

Beginner

**1** Punch grommets into three sides of tarp, spaced every 18 inches or so. Leave bottom side grommet-free.

**2** Feed bungee cords through grommets and secure screen to pergola or porch frame,

stretching as smoothly as possible, letting it hang with 2 to 3 inches of extra canvas pooling on ground.

**3** Arrange decorative river rocks across extra ground-level canvas, to weight tarp down. Set up projector following package directions, on sturdy side table or other base. Wait until dark, bring out popcorn and enjoy.

**TIPS** You can get a chic décor-magazine look with these easy styling ideas:

- Cozy up your outdoor theater space with comfy furniture such

as a chaise lounge, ottoman and chairs.

- For extra comfort, add pillows, throw blankets

and even an area rug.

- To serve refreshments, use stylish and safe acrylic tableware.
