Hazard: An unlocked handle can pinch a consumer's fingers against the generator when the generator is moved, posing finger amputation and crushing hazards if the locking pin is not installed.

Remedy: Always use the locking pin when moving or lifting the unit. If you own a generator with a serial number in the affected range, contact Generac to obtain a free repair kit consisting of a set of spacers to move the handle away from the frame, eliminating the pinch point. It is important to install this new repair kit, even if you installed the original repair kit. Customers who responded to the original recall will automatically be sent a new kit.

For More Information:

844-242-3493

Monday through Friday 8:00 a.m. to 5:00 p.m. C.T.
