Caution: Read all safety and operating instructions before using this equipment. This owner’s manual MUST accompany the equipment at all times.
INTRODUCTION

Congratulations on your purchase of a MK-101 Tile Saw. We are certain that you will be pleased with your purchase. MK Diamond takes pride in producing the finest construction power tools and diamond blades in the industry.

Operated correctly, your MK-101 Tile Saw should provide you with years of service. In order to help you, we have included this manual. This owners manual contains information necessary to operate and maintain your MK-101 Tile Saw safely and correctly. Please take the time to familiarize yourself with the MK-101 Tile Saw by reading and reviewing this manual.

Read and follow all safety, operating and maintenance instructions.

If you should have questions concerning your MK-101 Tile Saw, please feel free to call our friendly customer service department at: 800 421-5830

Regards,

MK Diamond

Read and follow all safety, operating and maintenance instructions. Failure to read and follow these instructions could result in injury or death to you or others. Failure to read and follow these instructions could also result in damage and/or reduced equipment life. Safety warnings and guidelines do not by themselves eliminate danger. They are not substitutes for proper accident prevention procedures and good judgement.

**SAFETY MESSAGES**

A safety message alerts you to potential hazards that could hurt you or others. Each safety message is preceded by a safety alert symbol (⚠️) and one of three words: DANGER, WARNING, or CAUTION.

⚠️ **DANGER**  You WILL be KILLED or SERIOUSLY INJURED if you DO NOT follow directions.

⚠️ **WARNING**  You CAN be KILLED or SERIOUSLY INJURED if you DO NOT follow directions.

⚠️ **CAUTION**  You CAN be INJURED if you DO NOT follow directions. It may also be used to alert against unsafe practices.

**DAMAGE PREVENTION AND INFORMATION MESSAGES**

A Damage Prevention Message is to inform the user of important information and/or instructions that could lead to equipment or other property damage if not followed. Information Messages convey information that pertains to the equipment being used. Each message will be preceded by the word NOTE, as in the example below.

**NOTE:** Equipment and/or property damage may result if these instructions are not followed.

**GENERAL SAFETY PRECAUTIONS AND HAZARD SYMBOLS**

In order to prevent injury, the following safety precautions and symbols should be followed at all times!

**ALWAYS** read this Owner’s Manual before operating the machine. DO NOT operate or service this equipment before reading this entire manual. Read and understand all warnings, instructions and controls on the machine. Know how to stop the equipment quickly in case of emergency. It is the operators responsibility to use this machine under safe working conditions and conform with federal, state and local codes or regulations pertaining to safety, air, pollution, noise etc...

**ALWAYS** keep the Blade and Belt Guards in place. DO NOT operate this machine with any guard or safety device removed. A Guard, or any damaged part should be repaired or replaced immediately.

**REMOVE ADJUSTING KEYS AND WRENCHES**

Form a habit of checking to see that keys and adjusting wrenches are removed from the power tool before it is turned on.

**KEEP WORK AREA CLEAN**

Cluttered work areas and benches invite accidents.

**DO NOT USE IN DANGEROUS PLACES**

DO NOT use power tools in damp or wet locations nor expose them to rain. Always keep the work area well lighted.
KEEP CHILDREN AWAY
All visitors and children should be kept a safe distance from work area.

MAKE THE WORKSHOP KID PROOF
Make the workshops kid proof by using padlocks, master switches or by removing starter keys.

DO NOT FORCE THE TOOL
A power tool will do a job better and safer operating at the rate for which it was designed.

USE THE RIGHT TOOL
DO NOT force a tool or an attachment, to do a job that it was not designed to do.

USE THE PROPER EXTENSION CORD
If using an extension cord make sure it is in good condition first. When using an extension cord, be sure to use one heavy enough to carry the current your product will draw. An undersized cord will cause a drop in line voltage that will result in a loss of power and overheating. Page 9 shows the correct AWG size to use depending on cord length and nameplate ampere rating. If in doubt, use the next heavier gauge. The smaller the gauge number, the heavier the cord.

USE PROPER APPAREL
DO NOT wear loose clothing, gloves, neckties, rings, bracelets, or other jewelry that may be caught in moving parts. Non-slip footwear is recommended. Wear protective hair covering to contain long hair.

PERSONAL PROTECTIVE EQUIPMENT
ALWAYS wear approved respiratory, head, ear and eye protection when operating this machine.

SECURE WORK
Clamps or a vise should be used to hold work whenever practical. Keeping your hands free to operate a power tool is safer.

DO NOT OVERREACH
Keep proper footing and balance at all times by not overreaching.

MAINTAIN TOOLS WITH CARE
Keep tools clean for the best and safest performance. Always follow maintenance instructions for lubricating, and when changing accessories.

DISCONNECT TOOLS
Power tools should always be disconnected before servicing or when changing accessories, such as blades, bits, cutters, and the like.

ALWAYS place the power ON/OFF switch in the OFF position when the saw is not in use.
USE RECOMMENDED ACCESSORIES
Consult the owner’s manual for recommended accessories. Using improper accessories may increase the risk of personal or by-stander injury. Unauthorized equipment modifications will void all warranties. Manufacturer does not assume responsibility for any accident due to equipment modifications.

ALWAYS ensure that the machine is on level ground before using.

NEVER STAND ON THE TOOL
 Serious injury could occur if a power tool is tipped, or if a cutting tool is unintentionally contacted.

TRANSPORT
When loading or unloading the machine, use caution. Remove the blade prior to hoisting, loading and transporting the machine.

CHECK FOR DAMAGED PARTS
Before using a power tool, check for damaged part. A guard or any other part that is damaged should be carefully checked to determine if would operate properly and perform its intended function. Always check moving parts for proper alignment or binding. Check for broken parts and mountings and all other conditions that may affect the operation of the power tool. A guard, or any damaged part, should be properly repaired or replaced.

DIRECTION OF ROTATION
A blade or cutter should always be installed so that rotation is in the direction of the arrow imprinted on the side of the blade or cutter. It should correspond with the rotational direction of the motor. Always feed work into a blade against the direction of rotation.

NEVER LEAVE A TOOL UNATTENDED
TURN POWER OFF - Do not leave a tool until it comes to a complete stop. Always turn a power tool OFF when leaving the work area, or, when a cut is finished.

NEVER disconnect any "emergency or safety devices". These devices are intended for operator safety. Disconnection of these devices can cause severe injury, bodily harm, or even death! Disconnection of any of these devices will void all warranties. Unauthorized equipment modifications will void all warranties. Manufacturer does not assume responsibility for any accident due to equipment modifications.

NEVER operate this equipment when not feeling well due to fatigue, illness or taking medicine.

Check the chemical properties of the material to be cut/grinded and follow all EPA/OSHA Regulations.
WARNING

Diamond Blades improperly used are dangerous. Comply with American National Standards Institute Safety Code, B7.1 and, Occupational Safety and Health Act covering Speed, Safety Guards, Flanges, Mounting Procedures, General Operating Rules, Handling, Storage and General Machine Conditions

ELECTRICAL SHOCK
NEVER touch electrical wires or components while the engine is running. Exposed, frayed or worn electrical wiring and plugs can be sources of electrical shock which could cause severe injury or burns. Do not touch the plug with wet hands.

ROTATING PARTS
Keep hands, feet, hair, and clothing away from all moving parts to prevent injury. Never operate the motor with covers, shrouds, or guards removed.

OVER SPEED
NEVER tamper with the governor components or settings to increase the maximum speed. Severe personal injury and damage to the engine or equipment can result if operated at speeds above maximum.

DO NOT EXPOSE TO RAIN
DO NOT expose to rain or use in damp locations.
SILICA DUST WARNING

Grinding/cutting/drilling of masonry, concrete, metal and other materials with silica in their composition may give off dust or mists containing crystalline silica. Silica is a basic component of sand, quartz, brick clay, granite and numerous other minerals and rocks. Repeated and/or substantial inhalation of airborne crystalline silica can cause serious or fatal respiratory diseases, including silicosis. In addition, California and some other authorities have listed respirable crystalline silica as a substance known to cause cancer. When cutting such materials, always follow respiratory precautions.

Use appropriate NIOSH-approved respiratory protection where dust hazard may occur. Paper masks or surgical masks without a NIOSH approval number are not recommended because they do little to protect the worker. For more information about respirator programs, including what respirators have received NIOSH approval as safe and effective, please visit the NIOSH website at: http://www.cdc.gov/niosh/topics/respirators

CALIFORNIA PROPOSITION 65 MESSAGE

Some dust created by power sanding, sawing, grinding, drilling, and other construction activities contain chemicals known (to the State of California) to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are:

- Lead, from lead-based paints
- Crystalline silica from bricks, cement and other masonry products
- Arsenic and chromium, from chemically treated lumber

For further information, consult the following sources:
http://www.osha.gov/dsg/topics/silicacrystalline/index.html
http://www.cdc.gov/niosh/docs/96-112/
http://oehha.ca.gov/prop65/law/P65law72003.html
http://www.dir.ca.gov/Title8/sub4.html

Your risk from these exposures varies depending on how often you do this type of work. To reduce your exposure to these chemicals, work in a well-ventilated area, and work with approved safety equipment, such as dust masks that are specially designed to filter out microscopic particles. Where use of a dust extraction device is possible, it should be used. To achieve a high level of dust collection, use an industrial HEPA vacuum cleaner. Observe OSHA 29 CFR part 1926.57 and 1926.103.

WARNING

Sawing and drilling generate dust. Excessive airborne particles may cause irritation to eyes, skin and respiratory tract. To avoid breathing impairment, always employ dust controls and protection suitable to the material being sawed or drilled; See OSHA (29 CFR Part 1910.1200).
ELECTRICAL REQUIREMENTS AND GROUNDING INSTRUCTIONS

In order to prevent potential electrical shock and injury, the following electrical safety precautions and symbols should be followed at all times!

⚠️ WARNING

In case of a malfunction or breakdown, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. This tool is equipped with an electric cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into a matching outlet that is properly installed and grounded in accordance with all local codes and ordinances.

• Do not modify the plug provided – if it will not fit the outlet; have the proper outlet installed by a qualified electrician
• Improper connections of the equipment-grounding conductor can result in a risk of electric shock. The equipment-grounding conductor is the insulated conductor that has an outer surface that is green, with or without yellow stripes. If repair or replacement of the electric cord or plug is necessary, do not connect the equipment-grounding conductor to a live terminal
• Check with a qualified electrician or service personnel if the grounding instructions are not completely understood, or if in doubt as to whether the tool is properly grounded
• Use only 3-wire extension cords that have 3-prong grounding plugs and 3-pole receptacles that accept the tool’s plug
• Repair or replace a damaged or worn cord immediately

⚠️ WARNING

This tool is intended for use on a circuit that has an outlet that looks like the one shown in Sketch A. The tool has a grounding plug that looks like the plug illustrated in Sketch A. A temporary adapter, which looks like the adapter illustrated in sketches B and C, may be used to connect this plug to a 2-pole receptacle as shown in Sketch B, if a properly grounded outlet is not available. The temporary adapter should be used only until a properly grounded outlet can be installed by a qualified electrician. The green-colored rigid ear, lug, and the like, extending from the adapter, must be connected to a permanent ground such as a properly grounded outlet box.

**NOTE:** Use of a temporary adapter is not permitted in Canada.
To avoid the possibility of the appliance plug or receptacle getting wet, position the machine to one side of a wall mounted receptacle. This will prevent water from dripping onto the receptacle or plug. A “drip loop,” shown in the picture below, should be arranged by the user to properly position the power cord relative to the power source.

WARNING

If operating the equipment in damp locations is unavoidable, ALWAYS use a Ground Fault Circuit Interrupter, ALWAYS wear rubber gloves and footwear in damp conditions.

DO NOT abuse the cord. Never use the cord to carry the equipment or to pull the plug from the outlet. Keep the cord away from heat, sharp edges, and moving parts. Replace damaged cords immediately. Damaged cords increase the risk of electric shock.

WARNING

To reduce the risk of electrocution, keep all connections dry and off the ground. A Ground Fault Circuit Interrupter (GFCI) should be provided on the circuit(s) or outlet(s) to be used for this machine. Receptacles are available having built-in GFCI protections and may be used for this measure of safety. When using an extension cord, GFCI should be installed closest to the power source, followed by the extension cord and lastly, the machine.

WARNING

The water pump requires a GFCI. To reduce risk of electrical shock when operating the machine with the pump plugged into the 3-pole receptacle on the motor, connect the saw to a GFCI outlet. See the pump manual and informational tags enclosed separately for all pump information.

WARNING

To reduce the risk of electrocution, keep all connections dry and off the ground. A Ground Fault Circuit Interrupter (GFCI) should be provided on the circuit(s) or outlet(s) to be used for this machine. Receptacles are available having built-in GFCI protections and may be used for this measure of safety. When using an extension cord, GFCI should be installed closest to the power source, followed by the extension cord and lastly, the machine.

WARNING

The water pump requires a GFCI. To reduce risk of electrical shock when operating the machine with the pump plugged into the 3-pole receptacle on the motor, connect the saw to a GFCI outlet. See the pump manual and informational tags enclosed separately for all pump information.

WARNING

To avoid the possibility of the appliance plug or receptacle getting wet, position the machine to one side of a wall mounted receptacle. This will prevent water from dripping onto the receptacle or plug. A “drip loop,” shown in the picture below, should be arranged by the user to properly position the power cord relative to the power source.
The “drip loop” is that part of the cord below the level of the receptacle, or the connector, if an extension cord is used. This method of positioning the cord prevents the travel of water along the power cord and coming in contact with the receptacle.

If the plug or receptacle gets wet, **DO NOT** unplug the cord. Disconnect the fuse or circuit breaker that supplies power to the tool. Then unplug and examine for presence of water in the receptacle.

To choose the proper extension cord,
- Locate the length of extension cord needed in the table below.
- Once the proper length is found, move down the column to obtain the correct AWG size required for that length of extension cord.

Safety labels contain important safety information. Please read the information contained on each safety label. These labels are considered a permanent part of your saw. If a label comes off or becomes hard to read, contact MK Diamond or your dealer for a replacement.

**WARNING**

For Your Safety Read Instruction Manual Before Operating Saw.

Disconnect Saw Before Servicing, when Changing Cutting Wheels and Cleaning.

Use Tool Only with Smooth Edge Cutting Wheels Free of Openings and Grooves.

Replace Damaged Cutting Wheel Before Operating.

Do Not Fill Water Bath Above Water Fill Line.

See Manual for Pump Replacement.

**NOTICE**

Most Motor Problems are caused by improper voltage and extension cords. Cord should be one-piece and short as possible. Cord selection should match the following table.

| 1-2 H.P. | 25' | 250' |
| 115v | 100' | 50' | 75' |
| No. 12 Wire | No. 10 Wire | No. 8 Wire |

**WARNING**

Grinding/cutting/drilling of masonry, concrete, metal and other materials with silica in their composition may give off dust or mists containing crystalline silica. Silica is a basic component of sand, quartz, brick clay, granite and numerous other minerals and rocks. Repeated and/or substantial inhalation of airborne crystalline silica can cause serious or fatal respiratory diseases, including silicosis. In addition, California and some other governments have listed respirable crystalline silica as a substance known to cause cancer.

For Your Own Safety Read Instruction Manual Before Operating Saw.

Wear Eye Protection.

Disconnect Saw Before Servicing, when Changing Cutting Wheels and Cleaning.

Use Tool Only with Smooth Edge Cutting Wheels Free of Openings and Grooves.

Replace Damaged Cutting Wheel Before Operating.

Do Not Fill Water Bath Above Water Fill Line.

See Manual for Pump Replacement.

For manuals and parts lists scan the QR code with your smart phone.

Warning Label Sheet Part # 166012
PRODUCT SPECIFICATIONS

The MK-101 is a versatile Tile Saw. Operated and used according to this manual, the MK-101 will provide years of dependable service.

General Specifications
The MK-101 Tile Saw is engineered as a tabletop or stand mounted wet tile saw. The saw includes a powerful 120V totally enclosed capacitor start Baldor motor with a thermal protective overload. The saw is capable of cutting tile up to twenty (20) inches in length, or diagonal cutting tile up to fourteen (14) inches. The saw can cut an object three (3) inches thick in one pass.

Motor Specifications
Motor specifications for the MK-101 are listed in table below.

<table>
<thead>
<tr>
<th>Specification</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Voltage</td>
<td>120V</td>

<td>RPM</td>
<td>3400 rpm</td>
</tr>
<tr>
<td>Horse Power</td>
<td>1.5 hp</td>
</tr>
<tr>
<td>Weight</td>
<td>92 lbs</td>
</tr>
</tbody>
</table>

Thermal Overload Protection
The motor is protected by a thermal overload equipped with a manual reset.

Blade Capacity
The MK-101 uses a ten (10) inch (254mm) diameter, wet cutting continuous rim, diamond blade with a five-eighths (5/8) inch (15.875 mm) arbor.

Tile Types
The MK-101 can cut a variety of tile types including Porcelain, Terracotta, Marble, Quarry and Slate, or almost any other non-ferrous material.

NOTE: The MK-101 is not designed to cut plastic or ferrous (metals) material.

J Belt Guard
UNPACKING

Your MK-101 has been shipped from the factory thoroughly inspected. Only minimal assembly is required.

⚠️ CAUTION Use proper lifting techniques when lifting the MK-101.

CONTENTS

In your container, you will find one (1) MK-101 frame and water basin, one (1) MK-101 Cutting Head, one (1) 10-inch wet cutting continuous rim diamond blade, one (1) adjustable cutting guide, one (1) electric water pump, one (1) 45° miter, one (1) blade wrench, one (1) splash guard, one (1) cooling transfer tube, one (1) flow adjusting clamp, one (1) drain plug, one (1) owners manual, one (1) pump manual and one (1) warranty card.
TRANSPORT

**CAUTION** 1. The MK-101 weighs approximately ninety-two (92) pounds.

The MK-101 is designed with a rigid frame and removable Cutting Head. Two people are required to transport the MK-101 with the Cutting Head installed. Remove the Cutting Head if one person is transporting the saw (see Cutting Head Installation and Removal in the following section).

**STAND**

The MK-101 weighs approximately ninety-two (92) pounds; follow the guidelines for transport in the TRANSPORT section, when placing it on the stand.

**NOTE:** If using the MK Diamond stand, follow the following steps.
Follow the assembly instructions to prepare your MK-101 for operation.

**NOTE:** If the cutting head is installed, go to the next step.

### CUTTING HEAD INSTALLATION

(A) Align Cutting Head rear Pivot Hole to the Post Pivot Shaft and slide onto shaft

(B) Ensure Cutting Head Stop is in upward position

(C) Install the Cutting Head onto the Post Pivot Shaft and install the Adjusting Knob

(D) For maximum cutting length, the Cutting Head should be in the front pivot hole and the Post should be in the rear post retaining hole.

**NOTE:** For small tiles (6” tile or smaller) the Cutting Head should be in the rear pivot hole and the Post should be in the forward post retaining hole. For large tiles and maximum cutting length, the Cutting Head should be in the front pivot hole and the Post should be in the rear post retaining hole.

**NOTE:** Move Cutting Head Stop in upward position when using rear pivot hole and in the down position when using front pivot hole, refer to page 24.
MK-101

ASSEMBLY

DIAMOND BLADE INSTALLATION

**NOTE:** When installing the Retaining Nut, do not “cross-thread” and DO NOT over tighten.

(A) Position Movable Cutting Table to the front of the saw and raise the Blade Guard. Tighten wing-nut

(B) Locate the Shaft Lock pushbutton on the underside of the Cutting Head

(C) Depress and hold the Shaft Lock pushbutton and remove Retaining Nut and Outer Flange using the Blade Wrench

(D) Raise Cutting Head and Install Diamond Blade onto Blade Shaft

(E) Verify the Blade is seated on the Blade Shaft and direction of rotation is correct

(F) Install Retaining Nut and Outer Flange, depress and hold the Shaft Lock pushbutton and tighten

ADJUSTABLE CUTTING GUIDE INSTALLATION

**NOTE:** The Adjustable Cutting Guide can be used on either side of the Diamond Blade.

(A) Loosen Adjustable Cutting Guide retaining thumbscrew and place it over the Movable Cutting Table Ruler/Stop

(B) Place the Adjustable Cutting Guide onto the Movable Cutting Table Ruler/Stop and tighten the retaining thumbscrew
SPASH GUARD INSTALLATION

(A) Install the retaining thumbscrew through the washer and Splash Guard then align to the hole found on back of the Blade Guard

(B) Install the Splash Guard onto the Blade Guard

WATER PUMP PREPARATION

(A) Press one end of the Cooling Transfer Tube into the Water Pump Discharge Fitting

(B) Slide Cooling Flow Adjusting clamp on to the Cooling Transfer Tube
MK-101

SETUP

PRE-START INSPECTION
Prior to beginning work, a pre-start inspection of the saw should be performed.

![Image](A) Ensure the ON/OFF Switch is in the OFF position

![Image](B) Verify the Movable Cutting Table moves freely

![Image](C) Inspect the Diamond Blade for damage – verify the blade is correct for the material being cut

![Image](D) Inspect the Pump Assembly for damage – ensure the cord is free of cracks or cuts

![Image](E) Inspect the MK-101 for damage

CONNECTING THE WATER PUMP

**WARNING**

1. To prevent the possibility electrical shock, the MK-101 MUST be de-energized when connecting the Water Pump.
2. To prevent the possibility of electrical shock, use only MK Diamond qualified replacement parts

**NOTE:** To prevent pump damage, the Water Pump must be disconnected if cutting with a Dry Blade.

![Image](A) Connect the Cooling Transfer Tube to the inlet connection of the Blade Guard

![Image](B) Connect the Water Pump power cord to the connection found on the back of the motor
WATER PUMP SETUP FOR OPERATION

The Water Pump can be setup for operation in two ways, External Water Source or Re-circulation.

**NOTE:** If using a dry blade for operation, DO NOT connect the water pump.

EXTERNAL WATER SOURCE

This is the preferred method of cooling.

![External Water Source Image]

1. Before powering or starting, check for damage that could prevent this equipment from proper operation or performing its intended function. Check for binding and alignment of moving parts. Check for damaged, broken, or missing parts.
2. Verify the On/Off switch is in the OFF position.
3. Before connecting the MK-101 to a power supply, be sure the voltage, cycle and phase of the job site power source meet the requirements.

RE-CIRCULATION

**NOTE:** When using the re-circulation method, the water should be changed often for longer pump life.

![Re-circulation Image]

1. Before powering or starting, check for damage that could prevent this equipment from proper operation or performing its intended function. Check for binding and alignment of moving parts. Check for damaged, broken, or missing parts.
2. Verify the On/Off switch is in the OFF position.
3. Before connecting the MK-101 to a power supply, be sure the voltage, cycle and phase of the job site power source meet the requirements.
4. If using an extension power cord, make sure the length and wire gauge correspond to the requirements listed in the table on page 10. An extension power cord that is too small in wire gauge (diameter), or too long in length, will cause the motor to overheat and could cause premature failure.

5. Use an approved Ground Fault Circuit Interrupter (GFCI)

6. Do not cover the motor vents as this could lead to motor overheating.

**NOTE:** In order to avoid breaker tripping, a 20-amp circuit breaker should be used.

---

**PORTABLE GENERATOR**

If using a portable generator, ensure the generator meets the following minimum requirements:

- **VOLTAGE**: 120V
- **CYCLE**: 60Hz
- **PHASE**: 1-phase

---

**GROUND FAULT CIRCUIT INTERRUPTER (GFCI)**

This saw is to be used with a Ground Fault Circuit Interrupter.

(A) Ensure the ON/OFF Switch is in the OFF position

(B) Plug MK-101 into the GFCI

(C) Plug the GFCI into the Power source *

---

**SET CUTTING DEPTH**

**CAUTION** When loosening the Cutting Head Adjusting Knob, the Cutting Head will pivot down unless held.

(A) Loosen Cutting Head Knob and move cutting head down

(B) Set cutting depth approximately 1/4 to 1/2 inch below the surface of the Movable Cutting Table

(C) Ensure the Adjusting Knob is tight
CAUTION  DO NOT FORCE THE TOOL. It will do the job better and safer at the rate for which it was designed.

(A) Loosen the Adjustable Cutting Guide retaining thumbscrew

(B) Position the Adjustable Cutting Guide to desired cut length

(C) Tighten the retaining thumbscrew

(D) Place the tile against the Ruler/Stop and Cutting Guide. Turn the motor ON

(E) Verify proper cooling flow on both sides of the blade (See Maintenance Section to increase/decrease flow)

(F) Perform the cut. Turn the motor OFF when work is complete
NOTE: To cut diagonal, the Dual 45° Flat Angle Guide (MK Diamond Part No. 134557-MK) should be used.

⚠️ CAUTION  DO NOT FORCE THE TOOL. It will do the job better and safer at the rate for which it was designed.

NOTE: If Cutting the tile in two equal halves, align the tile in the V-notch of the Movable Cutting Table Ruler/Stop.

(A) Remove the Adjustable Cutting Guide

(B) Place the Dual 45° Flat Angle Guide on the Ruler/Stop

(C) Position the Dual 45° Flat Angle Guide and tighten the retaining thumbscrew

(D) Position the tile against the Dual 45° Flat Angle Guide and the Ruler/Stop. Turn the motor ON

(E) Verify proper cooling flow on both sides of the blade (See Maintenance Section to increase/decrease flow)

(F) Perform the cut. Turn the motor OFF when work is complete
45° MITER CUTTING

**NOTE:** To cut 45° Miters, the 45° Bullnose Miter Guide (MK Diamond Part No. 134585-MK) should be used.

⚠️ **CAUTION** **DO NOT FORCE THE TOOL.** It will do the job better and safer at the rate for which it was designed.

(A) Remove the Adjustable Cutting Guide
(B) Place the 45° Miter Guide on the Ruler/Stop
(C) Position the 45° Miter Guide and tighten the retaining thumbscrew
(D) Position the tile on the 45° Miter Guide and the Ruler/Stop. Turn the motor ON
(E) Verify proper cooling flow on both sides of the blade (See Maintenance Section to increase/decrease flow)
(F) Perform the cut. Turn the motor OFF when work is complete
OFF-ANGLE CUTTING

NOTE: To cut angles other than 45° angles or Miters, a 90° Protractor (MK Diamond Part No. 134569-MK) should be used.

⚠️ CAUTION  DO NOT FORCE THE TOOL. It will do the job better and safer at the rate for which it was designed.

(A) Place the 90° Protractor on the Ruler/Stop

(B) Set the desired angle and tighten the thumbscrew and tighten retaining thumbscrews

(C) Position the tile against the 90° Protractor and the Ruler/Stop

(D) Turn the motor ON. Verify proper cooling flow on both sides of the blade

(E) Perform the cut. Turn the motor OFF when work is complete
ADJUSTING THE CUTTING HEAD

**CAUTION**  The Cutting Head is heavy. Care must be used when changing the position of the Cutting Head.

(A) Remove the blade and then Adjusting Knob

(B) Remove the Cutting Head from the rear pivot hole

(C) Move Cutting Head Stop to down position

(D) Install the Cutting Head onto the front pivot hole

(E) Install the Adjusting Knob

(F) Install Diamond Blade. Set cutting depth approx. 1/4 to 1/2 inch below the surface of the Movable Cutting Table

**NOTE:**  For small tiles (6” tile or smaller) the Cutting Head should be in the rear pivot hole and the Post should be in the forward post retaining hole. For large tiles and maximum cutting length, the Cutting Head should be in the front pivot hole and the Post should be in the rear post retaining hole.

**NOTE:**  Move Cutting Head Stop in upward positions when using rear pivot hole and in the down position when using front pivot hole.
ADJUSTING THE POST FOR MAXIMUM CUTTING LENGTH

⚠️ **CAUTION** The Cutting Head and Post are heavy. Care must be used when changing the position of the Cutting Head.

(A) Remove Water Basin

(B) Remove the Cutting Head (See Adjusting the Cutting Head)

(C) Loosen the Retaining Bolts.

(D) Remove both the Standoffs and Retaining Bolts.

(E) Relocate the Post to the rear Post retaining holes. Insert Standoffs and Retaining Bolts

(F) Secure the Post Support by tightening Retaining Bolts.

(G) Install the Cutting Head in rear Pivot Hole (See Adjusting the Cutting Head)

(H) Install the Water Basin and blade
NOTE:  
1. If an external water source was used, steps A through C may be skipped. 
2. Dispose of waste water in accordance with applicable Federal, State and Local laws.

(A)  
Clean the Water Pump suction of all debris. Refer to water pump manual.

(B)  
Place the Water Pump in an external container

(C)  
Run the MK-101 until clear water is seen at the blade cooling ports (Approx. 1 min.)

(D)  
Remove the Water Basin and clean.

(E)  
Clean the Movable Cutting Table Roller Wheel and Frame Support

(F)  
Clean the remainder of the MK-101

CAUTION  
Ensure the saw is disconnected before completing the remainder of the cleanup process.

CAUTION  
Ensure water is not forced into the motor casing when cleaning.
NEW MAINTENANCE

Perform the following after initial purchase and operation of the MK-101.

(A) Check and adjust V-belt tension following 1st 48 hours of operation (See V-belt Inspection)

MAINTENANCE FOLLOWING USE

To extend the life of the MK-101, the following procedure should be performed after each use. Lubricate all points listed below with light oils such as, 3 in 1, WD-40, etc.

(D) Lubricate the Guide Bar and the Roller Wheel Assembly
MONTHLY MAINTENANCE

The following maintenance should be performed Monthly.

(A) Remove the Diamond Blade

(B) Lubricate the Outer Flange and Retaining-nut

(C) Lubricate the Inner Flange

(D) Verify the Roller Wheel Assembly is tight and in good condition.

(E) Verify all motor mounting Bolts are tight

(F) Verify the Motor Adjustment Strap is tight

(G) Lubricate the Blade Guard Pivot Shaft

(H) Remove the Cutting Head (See Adjusting the Cutting Head)

(I) Lubricate the Cutting Head Adjustment Knob
FLOW ADJUSTMENT

NOTE: If flow to the diamond blade requires adjustment, perform the following actions.

(A) Increase cooling flow by releasing the Flow Adjusting Clamp

(B) Reduce cooling flow by pressing down on the Flow Adjusting Clamp
BLADE DRESSING

Like most cutting instruments, a diamond blade performs best when it is dressed. Over time and use, diamonds on the outer edge of the blade will become smoothed or "glazed" over. This will reduce grinding efficiency and may cause the blade to "wander" or bend giving the illusion of an alignment problem. When this occurs, the blade will need to be dressed. The diamond blade can be dressed using the MK Dressing Stick (part number 152972) and by following the steps below.

DIAMOND BLADE CHANGE OUT

NOTE: When installing the Retaining Screw, do not “cross-thread” and DO NOT over tighten the screw.

(A) Cut the Dressing Stick 7 or 8 times to dress the Blade

(B) Locate the Shaft Lock push button on the underside of the Cutting Head

(C) Remove Retaining Nut and Outer Flange, depress and hold the Shaft Lock hold button and loosen

(D) Remove the Diamond Blade

(E) Install the new Diamond Blade onto Blade Shaft. Install Outer Flange and Retaining Nut

(F) Verify the Blade is seated on the Blade Shaft and direction of rotation is correct

(G) Depress and hold the Shaft Lock button and tighten Retaining Nut
MK-101 is designed with a power transmission V-belt. In order to ensure the MK-101 operates at peak efficiency, the V-belt should be inspected monthly, and change if the V-belt shows damage and/or excessive wear.

**NOTE:**
1. When a new belt is installed, it should be inspected and re-tensioned after the first forty-eight (48) hours of operation.

**BELT INSPECTION, ADJUSTMENT AND REPLACEMENT**

(A) Remove the Diamond Blade

(B) Remove the Cutting Head (See Adjusting the Cutting Head)

(C) Remove the two top Belt Guard Bolts

(D) Remove Belt Guard bottom bolt

(E) Inspect the Micro-V Belt for cracks, fraying, separation and wear. Go to step H if replacement is required

(F) Check belt for proper tension. If tension correct, go to step Q (proper tension should be 1/8-inch deflection)

(G) Loosen the two front motor mounting bolts. If re-tensioning only, go to step N

(H) Loosen the two back motor mounting bolts

(I) Loosen the Motor Adjustment Strap
Push the motor toward the front of the Cutting Head to loosen the Micro-V Belt

Remove the Micro-V Belt

Install the new Micro-V Belt (MK Diamond Part No. 158194)

Verify the Micro-V Belt is seated in the grooves of both pulleys

Tighten the Motor Adjustment Strap to remove slack

Check Micro-V Belt tension (proper tension 1/8-inch) Repeat steps N and O until proper Micro-V Belt tension is achieved

Tighten the four motor mounting bolts

Install the Belt Guard
BLADE WILL NOT CUT PROPERLY

(A) Check for Smoothness or "Glazing" (See Blade Dressing Section)

(B) Check for proper blade rotation. Ensure arrow engraved on blade matches the directional arrow on blade guard

(C) Ensure the Blade Core is not bent. Verify the blade is correct for the material being used

MOVABLE CUTTING TABLE DOES NOT MOVE CORRECTLY

(A) Check the Guide Bar and Frame for cleanliness - clean if dirty

(D) Verify the Roller Wheel Assembly is tight and in good condition.
COOLING FLOW

(A) Check cooling flow Adjusting Clamp open

(B) Remove the Cooling Transfer Tube from the Blade Guard inlet

(C) Place Pump into a bucket of water and check flow

(D) Remove the Cooling Transfer Tube and check flow

(E) Inspect and clean pump. See pump manual

(F) Remove the Blade Guard Intake Fitting and check

NOTE: "Rooding" cooling channels is performed by inserting a small wire rod through the cooling inlet on top of the Blade Guard and directing the rod out through each of the cooling flow tubes located on the underside of the Blade Guard. The cooling channels should be "rodded" until all ports are free of foreign debris.

(G) Remove the Cooling Channel cover screws

(H) Rod Cooling Channels and recheck flow
BLADE STOPS TURNING

(A) Allow motor to cool and depress motor Overload Reset Switch

(B) Verify all plugs fully installed. Check Ground Fault Circuit Interrupter

NOTE: Verify circuit breaker at least 20 amps - if not, move to 20-amp circuit.
Verify circuit breaker not tripped. If tripped, reset once.
Check power source voltage is 120V - if not 120V, move to another circuit.

ORDERING INFORMATION

You may order MK Diamond products through your local MK Diamond distributor or, you may order direct from MK Diamond.

When ordering direct from MK Diamond, please have the following information ready before calling:

• The Model Number of the saw
• The Serial Number of the saw
• Where the saw was purchased and when
• The Part Number for the part(s) being ordered
• The Part Description for the part(s) being ordered

NOTE: There is a $25.00 minimum order when ordering direct from MK Diamond. A $6.00 charge will be added to orders having a net billing value under $50.00. All purchases must be made using VISA, MasterCard or American Express.

All parts may be ordered by calling toll free to – 800 421-5830 or 310 539-5221 and asking for Customer Service. For technical questions, call – 800 474-5594.

RETURN MATERIALS POLICY

To expedite the service relative to the return of a product purchased through MK Diamond, please observe the following:

NOTE: When returning all items, they must have been purchased within the previous twelve (12) months.

• Have the Model Number of the saw
• Have the Serial Number of the saw
• Have the location of where the saw was purchased
• Have the date when the saw was purchased
• Contact Customer Service for approval to return the item(s)
• Obtain a Returned Goods Number (RGA) authorizing the return
• Follow the packaging instructions in the following section
• Ensure your item(s) are prepaid to the destination

For returned items, call toll free to – 800 421-5830 or 310 539-5221 and ask for Customer Service. For technical questions, call – 800 474-5594 or 310 257-2845.

PACKAGING INSTRUCTIONS

• Remove the Cutting Head and Support Angle Assembly
• Dry the saw before shipping
• When packing, include the following: Saw, Diamond Blade, Blade Guard and Support Angle Assembly and Adjustable Cutting Guide (Other Accessories are not required)
• Package the unit in its original container or one of comparable size (do not ship the unit partially exposed)
• Ensure all parts are secured in the packaging to prevent moving

AUTHORIZED SERVICE CENTERS

For quicker repair time, you may contact MK Diamond Customer Service, toll free, at 800 421-5830 or 310 539-5221 for the Authorized Service Center closest to you or visit our web site at www.mkdiamond.com. For technical questions, call – 800 474-5594.
CONTACT:
Please contact MK Diamond Products, Inc. Customer Service Department with any questions you might have regarding distributors, parts or service.
Telephone: (800) 421-5830
Fax: (310) 539-5158
E-mail: Customer_Service@MKDiamond.com
Customer Service Hours: Monday through Friday, 6AM-4PM PST

MK Diamond Products, Inc.
1315 Storm Parkway
Torrance, CA 90501

MK DIAMOND PRODUCTS, INC. LIMITED WARRANTY

MK DIAMOND PRODUCTS, INC. will guarantee every machine they build, to be free from defects in material and workmanship for (1) one year from date of purchase. The obligation of MK DIAMOND PRODUCTS, INC. under this warranty is limited to the repair or replacement of any parts which, under normal use, prove to be defective in material or workmanship. The parts involved or the unit in question should be returned to MK DIAMOND PRODUCTS, INC. or to a point designated by us, transportation prepaid.

This warranty does not obligate us to bear the cost of labor or transportation charges in connection with replacement or repair of defective parts. Likewise, it shall NOT apply to any unit which has been subjected to misuse, neglect or accident. This warranty does NOT apply to any machine which has been repaired or altered outside our factory.

This warranty does NOT obligate MK DIAMOND PRODUCTS, INC., with respect to items not of our manufacture, such as engines, motors, hydraulics, etc., which are subject to their own guarantees and warranties.

We shall in no event be liable for consequential damages or contingent liabilities arising out of failure of any equipment or parts to operate properly.
